11	Wrench	1

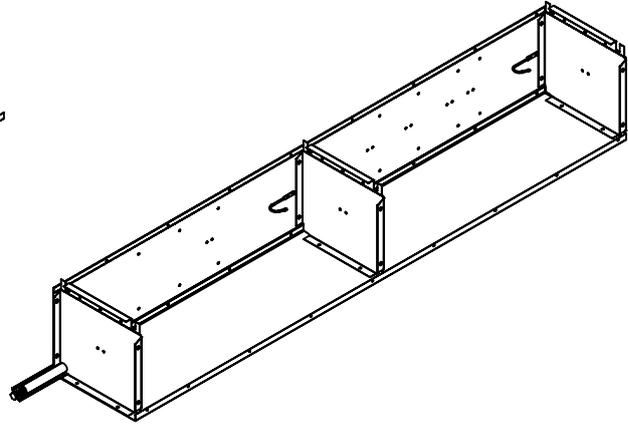

# BASIC ASSEMBLY OF SINGLE ROW LOCKERS

Step One:

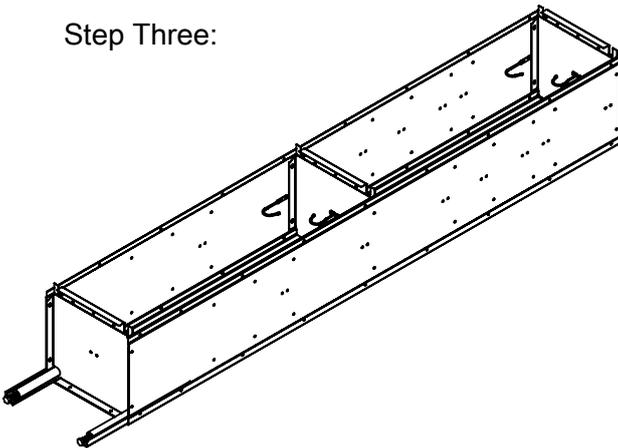

- A: Align side panel and back panel vertically and securely connect them with bolts beginning at the top edge
- B: Before inserting the last two sets of bolts at the bottom of the panels insert one extension leg to the corner of panel set and then secure the last two bolts of the panels and extension leg together

Step Two:

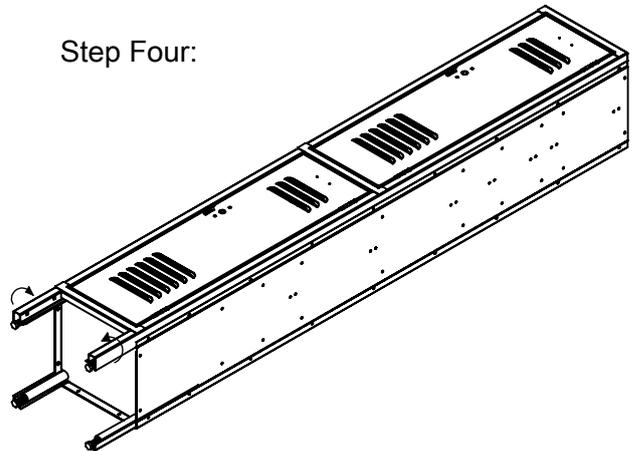

- A: Bolt the three shelves to the top, middle and bottom to the panel set
- B: Confirm that the extension leg is positioned against the bottom of the lower shelf

Step Three:

- A: Bolt other extension leg to the bottom corner of panel set, confirm that the extension leg is positioned against the bottom of the lower shelf
- B: Place second side panel in position as shown above and bolt it to the panel set
- C: Bolt the double hooks to top and middle shelves and the single hooks to side panels

Step Four:

- A: Place front panel on top of panel sets as shown above, you may need to squeeze the frame sides together so that it snaps on to panel set. Align the screw holes and connect all panels with bolts and nuts
- B: If you plan to join locker to another locker, align screw holes on the middle of side panels and insert bolts through both lockers side panels and use nuts to secure both lockers together
