10	Wrench	1

BASIC ASSEMBLY OF SINGLE ROW LOCKERS

Step One:

- A: Align side panel and back panel vertically and securely connect them with bolts beginning at the top edge
- B: Before inserting the last two sets of bolts at the bottom of the panels insert one extension leg to the corner of panel set and then secure the last two bolts of the panels and extension leg together

Step Two:

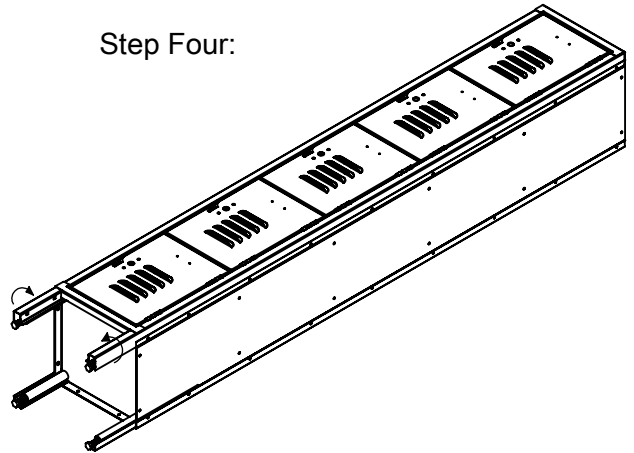

- A: Bolt the four shelves and top and bottom panels to the panel set
- B: Confirm that the extension leg is inserted all the way in and is touching the bottom panel

Step Three:

- A: Bolt other extension leg to the bottom corner of panel set, confirm that the extension leg is touching the bottom panel
- B: Place second side panel in position as shown above and bolt it to the panel set

Step Four:

- A: Place front panel on top of panel sets as shown above, squeeze the frame sides together so that it snaps on to panel set. Align the screw holes and connect all panels with bolts and nuts
- B: If you plan to join locker to another locker, align screw holes on the middle of side panels and insert bolts through both lockers side panels and use nuts to secure both lockers together
