

Size Guide: Soft Serve

The below chart shows what we have tested each model to be capable of serving per minute, per barrel/freezing cylinder.

<u>Model</u>	<u>4oz</u>	<u>6oz</u>	<u>8oz</u>	<u>16oz</u>
6210	2	1.5	1	not recommended
6228	4	3	2	not recommended
6236	6	4	3	1.5
6235/6250	3.5	2	1.5	not recommended
6378	6	4	3	1.5

Size is referenced in fluid oz (volume), not weight.

Correctly sizing the machine is important to ensure smooth operation. Dispensing more product than the machine is designed for will cause problems like freeze ups and could cause damage to the machine not covered under warranty.

Note: ambient temperature, machine clearance, and product ingredients may increase or decrease output.
