cool new light.*

Coolscapes Reach-ins

The fresh way to look at foodservice refrigeration.

Designed with operator input and operational expertise, our reach in series provides operators just what they need to keep their food fresh and their kitchen running smoothly. Our unique reach in refrigeration system, GreenGenius™, preserves the environment, saves energy and decreases utility costs. Delfield reach ins offer exclusive features like full integral door length handles, self- closing doors up to 90°, LED interior light, greater capacity without increasing foot print and easy to read electronic display.

Epoxy coated shelves on easily adjustable pilasters (GB and GBS Series only)

Simple stay open/self closing door hinges for ease of use

Industry leading interior usable storage, more capacity at a great price point

LED interior lights standard

Durable ABS door liner with gasket protection

Easy-grip, integral side door handle, protects the gasket extending its life and is ergonomically designed for end users

Fits through standard doorways

Easily removable door gaskets

Top mount, quality door locks keeps your investment safe.

Electronic controls with adaptive defrost

Our best refrigeration system ever. GreenGenius™

GreenGenius is our most advanced, energy efficient, environmentally friendly hydrocarbon refrigeration system we have ever produced. Our top mount system maximizes internal storage space and improves maintenance access by having a one-piece, removable system up top and out of the way. This new system maximizes refrigeration efficiency and energy savings all while helping to save the environment by utilizing natural R290 refrigerant which has one of the lowest GWP (Global Warming Potential) of any commercially approved refrigerants. Find out more at www.delfield.com.

What is GreenGenius™?

GreenGenius is Delfield's most energy efficient, environmentally friendly hydrocarbon based refrigeration system. GreenGenius was built from 60 years of Delfield refrigeration knowledge and uses natural refrigeration technology to produce Delfield's best refrigeration system ever. This new system uses R290 refrigerant, a natural hydrocarbon refrigerant that allows GreenGenius to meet and/or exceed new Department of Energy (DOE) and ENERGY STAR® 3.0 standards on most units. With adaptive defrost you never again have to worry about when your system will go into defrost, the system monitors the environment and automatically adjusts defrost times so you always have a clean, ice free evaporator, all the time. Look for this symbol on Delfield refrigeration products. The next generation of refrigeration system is here in GreenGenius.
