- Staged filling keeps the boil boiling
- Controls include 60 minute time with constant steam, on/off switch and lighted ready and cook light
- Fast cook times

C24EA5 DLX with PowerSteam™

## VULCAN COUNTER STEAMER KEY FEATURES & BENEFITS

- Powerful 8.5 or 15 kW span voltage heaters for high quality steam
- Basic controls include 60 minute timer, pull for on and push for off with lighted ready light
- Where price is important, design delivers steaming results with a high volume of quality steam

## DLX BASIC MINERAL TOLERANT GENERATOR DESIGN WITH SMARTDRAIN POWERFLUSH™ SYSTEM

- Generator slopes 5° to a large drain
- Span voltage heaters are top mounted spaced to allow scale to shed
- During draining water is injected into the drain 4 seconds on and 10 seconds off
- Generator is designed so that scale, even with water treatment, does not obstruct the draining of the generator and the heaters do not become encased in scale—less down time and longer life
