MOPPING EQUIPMENT

A COMPLETE GUIDE TO MOPPING TOOLS & APPLICATORS

Important tools for your Green Cleaning Program

Improve floor cleaning effectiveness

DEFINING GREEN

Sustainability has become a globally recognized term to define environmental products and practices. What does this mean? Simply stated in Executive Order 13011, green cleaning is about using “products and services that reduce the health and environmental impacts compared to similar products and services used for the same purpose.” Other criteria to be considered include developing strategies for purchasing tools, supplies and equipment that address environmentally preferable attributes such as durability, reparability and recycled content.

WHAT IS RECYCLING AND WHY DO IT?

The series of activities by which materials that are no longer useful to the generator are collected, sorted, processed and converted into raw materials and used in the production of new products.

WHAT IS POST-CONSUMER RECYCLED CONTENT?

Post-consumer content or waste is defined as any product which has served its intended use by a business or a consumer, which has been disposed and subsequently separated from solid waste for use as a constituent in a new product. All Wilen® mops are constructed of recycled and reclaimed fibers.

WHO SHOULD ADOPT A COMPREHENSIVE RECYCLING PROGRAM?

Adopting a comprehensive Green program is something that every organization can and should do. Stewardship of the environment is everyone's responsibility, and the benefits are many:

- Conserves natural resources such as timber, water and minerals
- Reduces the reliance on landfills and incinerators
- Reduces greenhouse gas emissions and helps stem the dangers of global climate change
- Energy savings from the processing of recycled materials versus virgin materials which require extraction, refinement and transportation
- Helping to sustain the environment for future generations

WHY CHOOSE WILEN®?

All Wilen® wet mops have **green attributes** that promote and enhance a comprehensive sustainability program. This is a clear differentiator. Most competitors feature only one family of mops with green attributes. The Wilen program® has an entire offering of wet mops with green attributes to meet all needs and budgets. You can be sure that Wilen® wet mops are environmentally friendly and are constructed with a level of quality that ensures long-lasting durability.

WET MOP QUICK FACTS

LET'S TALK VALUE

Selling the Right Mop for the Right Job

As every successful distributor knows, providing your customers with high value products results in customer satisfaction. And satisfied customers are *repeat* customers.

But how can an often overlooked commodity product like a mop affect your bottom line? Even though a mop represents an insignificant part of a job's cost, it has a great impact on the results. A \$1.75 mop can ruin an otherwise good finish, while a \$4.00 looped-end mop can make it look like a million. Upgrading your customer's floor care tools to looped-end mops provides them with better performance, longer mop life and reduced labor costs.

Since labor cost account for over 90% of a floor care program, it makes sense to help your customer reduce this cost. Looped-end mops, with their wider surface coverage, superior absorption and cleaner results can reduce labor costs by up to one-fourth, providing you with a satisfied customer.

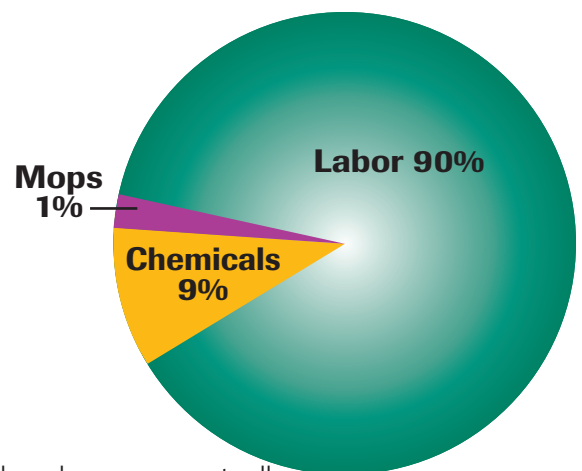

And, since looped-end mops outlast cut-end mops up to eight times, your customer saves even more. While that may result in less mop sales, take heart ~ a looped-end mop costs more and applies more chemical, resulting in higher-profit sales for you.

WHAT ARE THE FACTS?

Choose a tool that gets the job done faster and better ~

Why use an inefficient, "disposable" cut-end mop when you can get the job done twice as fast with better results using a looped-end mop? Looped-end mops cost more, but the price of a tool is less than 1% of the cost of mopping a floor.

One looped-end mop will outlast eight cut-end mops. A looped-end mop can actually be less expensive ~ by up to three times! That means less mops to order, stock use, change and dispose of.

WET MOP QUICK FACTS

The real savings are labor costs, an expense that eats up over 90% of your floor care budget. Several factors contribute to a looped-end mop's cost advantage.

A looped-end mop covers a wider surface area (without gaps and loose strands common with cut-end mops), absorbs up to six times as much liquid and covers twice as much floor with fewer trips to the bucket and wringer ~ in the same amount of time! Your annual savings in labor can easily be in the thousands of dollars.

MOP COST SAVINGS

Figures based on buying eight cut-end mops per month.

	Cut-End (\$1.75 each)	Looped-End (\$4 each)
Monthly Cost	\$14.00	\$4.00
<i>Savings</i>	<i>\$10.00</i>	
Annual Total	\$168.00	\$48.00
<i>Savings</i>	<i>\$120.00 (71%)</i>	

LABOR SAVINGS

Figures based on mopping 5000 square feet.

	Cut-End	Looped-End
Labor (\$8/hr.)	\$16.00	\$8.00
Clean Up	\$2.00	\$2.00
Daily Total	\$18.00	\$10.00
<i>Savings</i>	<i>\$8.00</i>	
Monthly Total	\$540.00	\$300.00
<i>Savings</i>	<i>\$240.00</i>	
Annual Total	\$6,480.00	\$3,600.00
<i>Savings</i>	<i>\$2,880.00 (44%)</i>	

In addition, looped-end mops provide better results, whether just damp mopping or finishing. That's because looped-end mops lint much less, providing a smoother application of chemical and have tailbands that help prevent tangles. You're cleaning and finishing floors better ~ for less cost, a fact that both accountants and users will appreciate!

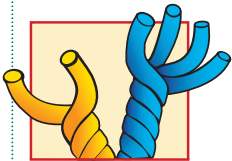

WET MOP VALUE QUICK FACTS

YARN	ADVANTAGES	DISADVANTAGES	USES
Cotton	Good absorption & retention. Low initial cost. Limited shrinkage.	Requires break-in. Lints and dries slowly, promotes mildew and deterioration. Low release.	General Use, Picking up Liquids, Scrubbing
Rayon	Quick absorption & release. Dries fast, mildew resistant. Cleaner yarn, lints less.	Shrinks when laundered.	Applying Liquids (finishes, disinfectants)
Blends	Ideal balance for price, performance and durability. Synthetic fibers add durability & color	Limited Shrinking (unless pre-shrunk)	General Maintenance, Disinfecting
Synthetic	Long staple fiber for superior tensile strength, no lint. Bleach and mildew resistant.	Higher cost, Poor absorption	Cleanrooms, Disinfecting

To accommodate your specific cleaning needs and budget, we offer a wide variety of yarns as well as new products to help users do their job more efficiently. Let the following information, and our application guide, assist you in choosing which mops are right for your needs.

Yarn

Certain yarns do a specific task better than other yarns. That's why there is such a variety of mops. To get maximum efficiency and value from a wet mop, it is important to select the right yarn for the job.

Yarn Ply

Yarn ply indicates the number of strands twisted together to make a single yarn strand. More plies give added strength, though higher ply numbers do not necessarily mean higher quality yarn. More strands may add durability but they also decrease absorbency.

It's much better and more cost effective to choose a higher quality yarn than a high ply, low quality yarn.

Twist

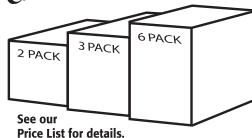

A yarn's "twist" is a result of how tightly the fiber strands are wound together. While a tightly twisted yarn might be stronger and last longer, its absorbency may be decreased. Like yarn ply, the best value isn't determined by the yarn's twist, but by the type and quality of the yarn and the mop's construction. A mop with looped-end construction enables the yarn to have a loose twist while eliminating fraying.

Sizes

A mop's size should be in relation to the job to be performed, the mop wringer being used and the user's size. Cut-end mops are sized by their approximate weight in ounces. Looped-end mops are sized by industry standards since they absorb and retain much more while also covering a greater surface area than a cut-end mop of comparable weight.

ADDITIONAL CASE PACK OPTIONS

See our Price List for details.

Cut-End

The cut-end is the standard, most popular and economical (initially) mop style. Cut-end mops fray and unravel, increasing the lint factor and leaving loose strands behind. In addition, without tailbands, cut-end mops cover less area per pass. Since cut-end mops cannot be laundered, they are often considered "disposable" and thrown away before their useful life is over.

Looped-End Mops

The looped-end is a premium style mop designed for superior performance and extended life. There are no ends to fray or unravel as the mop sweeps over the floor surface in a wide, even path. Looped-end mops can be laundered for longer life and cleaner appearance. The initial investment is soon compensated with lower replacement, reduced labor cost and increased performance.

Launderable, Pre-Shrunk Looped-End Mops

LAUNDERABLE, PRE-SHRUNK MOPS

Our line of pre-shrunk, looped-end mops is designed to meet the needs of the health care industry and other users who launder mops. These mops may be laundered repeatedly while maintaining their clean appearance, low lint factor, absorbency and strength without shrinking. They also save money by outlasting cut-end mops up to eight times and reducing labor costs by up to one half!

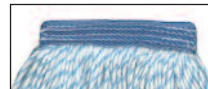

Size	Equivalent Ounces	Band Color	Approximate Lbs. / Dz.
Small	12-14	Red	13
Medium	16-20	Green	15
Large	24-32	Blue	18
X-Large	32-40	Yellow	23

Headbands

1 1/4" headbands are available for stirrup-type handles and are useful on finishing-type mops such as our FastTrack™ looped-end mop. The 5" width headbands are compatible with clamp and stirrup-type handles. The synthetic mesh material provides non-abrasive scrubbing to help dislodge dirt and to allow quick drying of yarns. Abrasive scrubbing pads can also be included.

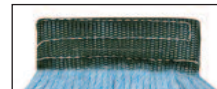

Narrow Headband

6.25" x 1.25"

Wide Headband

6.25" x 5"

MicroBlocker™

Locked into the yarn are fibers containing a registered antimicrobial additive. The additive protects the mop head from deterioration by inhibiting the growth of stain and odor causing bacteria, mold, mildew and yeast in and on the mop head.

LOOPED-END WET MOPS

BASIC MOP FACTS:

Pre-shrunk mops stand up to heavy use and repeated laundering.

Looped-end construction outlasts cut-end mops up to eight times.

Ideal for health care environments.

Looped-End Launderable, Pre-Shrunk Mops

FANTASTIC™

Ideal for disinfecting and all purpose cleaning in a healthcare environment. Constructed of super absorbent, 4-ply rayon/synthetic yarn. Synthetic blend will hold up to bleach, will not discolor and resists the growth of mildew and bacteria. **100% recycled rayon and PET**

LOOPED-END WET MOPS

BASIC FINISH MOP FACTS:

"Candy Cane" striped yarn distinguishes mop to prevent chemical contamination.

Rayon blend yarn provides quick, controlled liquid release.

Looped-End Finish Mops

LIQUID APPLICATION MOPS

When it's time to apply finishes and sealers, use a tool designed for the job. Our conventional style finish mops provide a smooth, clean finish while outlasting conventional cut-end mops over eight times.

For larger finish jobs, the Floor Finish Flat Mop provides performance and economy. You'll get a better finish with less effort.

SMOOTHIE™ FINISH

Premium mop reduces worker fatigue by up to 25%. 100% nylon holds and releases floor finish more quickly and evenly than conventional finish mops, saving time and money!

50% reclaimed fibers

1.25" Tape Band Item Number	Size	Yarn Color	Pack Case	Case Weight	Case Cube

FLOOR FINISH FLAT MOP

For larger finish jobs, the Floor Finish Flat Mop provides performance and economy. This looped-end mop is constructed of a high-wet modulus rayon blend yarn that provides quick, controlled liquid release. The Floor Finish Flat Mop effectively covers up to a 72" wide swath. Rayon finish mop features a mesh backing that allows you to pour finish directly into mop for better dispersal of fluids. **60% PET and recycled rayon**

CUT-END WET MOPS

Scrubbing pads are available on any mop with wide headbands for an additional fee. Ideal for removing stubborn dirt and marks

BASIC CUT-END MOP FACTS:

Cotton yarn is ideal for scrubbing and general cleaning.

Rayon yarn is great for liquid pick-up, economy finishing and disinfecting.

Cut-End Industry Standard Mops

GOGO BLEND

The benefit of cotton/synthetic yarn makes this the best choice for cut-end mops. No break-in time is needed. Very absorbent. **30% RPET and recycled rayon**

DUST MOP VALUE QUICK FACTS

CHOOSING THE BEST VALUE IN DUST MOPS

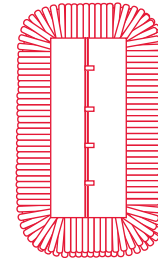

The removal of dust and dirt particles is the first step in proper floor care. A preventative maintenance program using quality dust mops will protect your floor and finish from abrasive dust and dirt particles. To accommodate your needs, we offer a wider variety of dust mops to assist in the efficient removal of dust and dirt. Let the following information assist you in choosing which dust mop is right for your needs.

Yarn

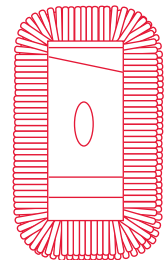

Cotton is the most popular and economical yarn but lacks the longevity of stronger, though less absorbent, synthetic fibers. Cotton is often blended with synthetic fibers to add strength. Some of these yarns are designed to withstand laundering while others, like disposables, are constructed with bulky, loosely twisted yarn that actually picks up dust better. Our PermaTwist™ cotton yarn combines exceptional durability via a unique fiber bonding process. Nylon, like that used in our Durastat™, has electro-static properties that attract dust particles without the use of treatment.

Backing

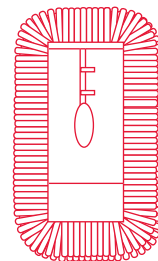

Synthetic backing material has replaced cotton as the industry standard because it dries much faster and absorbs less treatment than cotton. We also offer a variety of backing styles including: Open Back, Key Hole, Slot Pocket and Break-Away (illustrated at right). All four backing styles are available for construction in our Professional Dust Mop category. Ties are also available upon request. Our Swivel Snap category is only available with a Key Hole style backing. Our Value Line category is only available with an Open Back style. Our Disposable Dust Mops are only available with backings as shown. Backing colors include: red, blue, green and white, and match the color of the yarn, only. Backing colors may not differ from the yarn color.

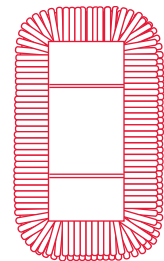

Open Back

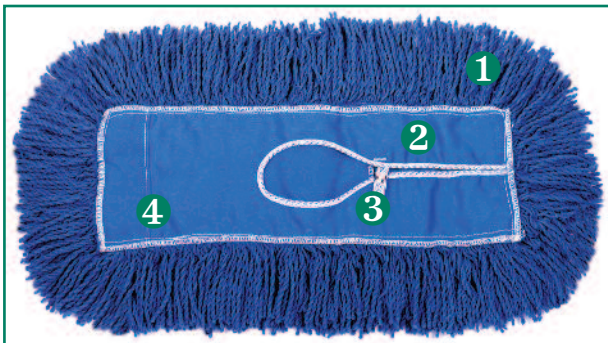

Slot Pocket

Key Hole

Break Away

- ① A wide variety of high grade yarns provide maximum durability and performance.
- ② Extra stitching assures long life, even with laundering.
- ③ Heavy-duty, rust resistant snaps are fast and easy to use.
- ④ Durable synthetic (polyester) backing dries fast and is available in bright colors.

Cut-End

The cut-end dust mop, though more economical at first, tends to fray, unravel and lint. These problems decrease its performance and lead to replacement of the mop. These problems are intensified by laundering. Our PermaTwist™ solves this problem by bonding the yarn fibers.

Looped-End

By trapping more dust, producing less yarn debris, and resisting tangles, the looped-end dust mop delivers maximum performance. Because looped-end yarns withstand heavy use and frequent laundering without fraying and unraveling, linting is virtually eliminated. Looped-end yarn is available in long strands for greater coverage or short loops for hi-tech and health care applications.

Durability

High quality construction standards lead to the best value in a dust mop. Mops of professional quality have pre-shrunk backings and top grade yarn to withstand heavy use and repeated launderings. Reinforced stitching at stress points are signs of better mop construction. Innovative yarns, like our Twister Loop™, Durastat™ and PermaTwist™, can provide longer lasting service as well as increased performance.

Frames & Handles

To provide free swiveling or rigid handle positions, use a handle with a swivel-snap device attached to the frame. Frames are available from 12" to 72". Our Stick-M™ line uses a flat plastic base for maximum surface contact. Its velcro type attachment system allows quick and easy changes. Our Wear Ever™ Frame also provides a wide, flat surface for maximum yarn-to-floor contact, resulting in greater dust mop efficiency.

LAUNDERABLE DUST MOPS

This close-up PermaTwist™ strand shows the "blooming" effect of the yarn's end after laundering, enabling maximum dust pick-up and retention.

BASIC DUST MOP FACTS:

Innovative, launderable yarns stand up to heavy use and repeated washing.

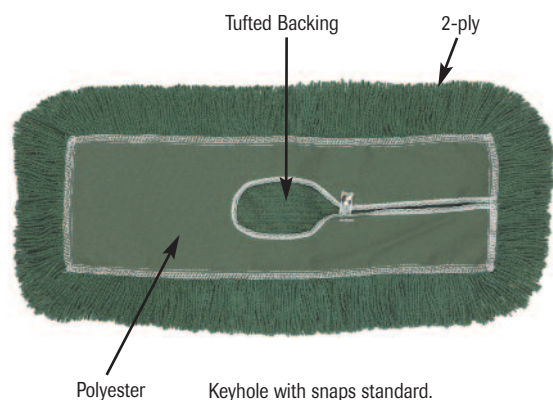

Looped-end yarn traps more dust, lints less and is more durable than cut-end yarn.

Professional Launderable Dust Mops

PERMATWIST™

Exclusive heat set bonding process of 100% ring-spun yarn eliminates fraying and linting. Extremely durable and launderable. Permanent color keeps this duster looking new longer.

100% recycled cotton

DISPOSABLE DUST MOPS

BASIC DISPOSABLE DUST MOP FACTS:

Bulky, absorbent disposable yarn holds more dust.

Dust mop treatment can help a mop collect up to 80% more dust.

TIE-FREE™

Pre-treated, cotton/synthetic yarn provides durability, value and performance. Bulky yarn will retain more dust and fine dirt particles than other lesser quality dust mops. Will cover over a million square feet before replacement is needed. **100% recycled cotton and PET**

5" Back Item Number	Size	Yarn Color	Pack Case	Case Weight	Case Cube
