to keep products COLD.

INNOVATIVE DESIGNS FOR YOUR FOODSERVICE NEEDS

Continental
Refrigerator

Over 2400+ models and growing...

During this past decade, we've experienced extraordinary growth and change here at Continental Refrigerator, thanks largely to our continued commitment to teamwork, technology-focused product strategies and to our policy of placing customer satisfaction above all else. We've successfully reached key milestones, increased research and development initiatives and achieved significant technological advancements. Even in the face of challenging economic conditions, we're finding new ways to take advantage of the evolving industry landscape to ensure Continental Refrigerator remains your number one choice for commercial refrigeration.

The upcoming years will be exciting as we continue to broaden our business efforts and move from promise to product. We've set increasingly ambitious goals for ourselves, but we have the intense vision and resources to achieve them. We have the knowledge, experience and expertise to bring specialty products to market, and we know the steps we need to take are simply an extension of what we have been doing successfully since our inception. Simultaneously, we plan to continue responding to market challenges and expand our lines of refrigeration equipment with products boasting enhanced feature sets and ENERGY STAR qualification in order to engage a wider customer base. Consequently, we have set an aggressive timeline for the development of new products to fulfill our commitment to the foodservice industry.

BBC69S-SS-SGD

We take pride in knowing what our customers demand and embrace it as a philosophy for our operations and planning. We know the "real world" operations of commercial kitchens and build that knowledge into every unit we make. That's why we engineer to a higher standard, by testing all our equipment in 100°F, exceeding the standard of 86°F and customizing our standard product line to create flexible solutions for a variety of kitchen applications.

I praise each of our employees for making these past years such an exhilarating success, even in turbulent times. I would also like to extend my thanks to our customers and our suppliers for their unfailing sense of devotion, responsibility, guidance and support.

Your satisfaction is our number one priority!

Sincerely,

Brian P. Kelly
President

Easily removable stainless steel drip grate for cleaning

Single, dual or triple faucet options

Full length, extra large coil and keg line tubing

KEG COOLERS

Store and Serve Up Icy, Cold Draft Beer

For your next bar/restaurant design, consider the performance, sustainability and versatility of a Continental Refrigerator Keg Cooler. Built to last with all stainless steel countertop, heavy-duty galvanized interior and reinforced stainless steel floor.

- 6 sizes ranging from 24" - 90"
- Front breathing air flow (intake/exhaust from the front)
- Standard or shallow depth
- Single, dual or triple faucets
- Modify beer tap columns placement
- Compressor on left (standard) or right (option)

KC69 with modified tower placement to the right

Overview of Keg Coolers

Widths

Side View (Shallow Depth not available on KC24 models)

Keg Capacities (standard depth, 1/2 keg straight wall capacities shown, SW = straight wall, B = barrel)

Standard Features

Performance-rated, **front breathing** refrigeration system (except 24" models)

Environmentally-safe R-134a refrigerant

High density, non-CFC polyurethane foamed-in-place insulation

Exterior Cabinet Finishes

Standard Models:

Wear resistant, textured baked enamel finish (black)

SS Models:

Stainless steel

All stainless steel countertop, heavy-duty galvanized interior side panels and top, stainless steel interior back and reinforced stainless steel floor

Stainless steel reinforced threshold

Full length, extra large coil

Continuously cooled, 3" diameter beer columns with lever faucet, CO₂ pressure relief distributor and CO₂ tubing with clamps

Easily removable stainless steel drip grate with convenient front-mounted cleanout drainage hose (pan not removable)

Easily accessible and serviceable slide-out condensing unit

Readily removable front, rear and side venting louvered grills

Automatic, energy-saving, non-electric condensate evaporator

Cylinder-keyed security lock (each door)

Magnetic snap-in door gasket (each door)

Interior light (except 24" models)

5" casters (24" models only)

Full length, extra large coil

Front breathing with removable front, rear and side louvered grills

Stainless steel reinforced threshold sill (hinged door models)

BACK BAR COOLERS

Maximize the Number of Cool, Refreshing Drinks on Hand

Pass-thru Back Bar Coolers maximize better use of floor space on island bar layouts with access on both sides as either hinged or sliding glass doors.

- 6 sizes ranging from 24" - 90"
- Front breathing air flow (intake/exhaust from the front)
- Standard or shallow depth
- Pass-thru models
- Display models, hinged or sliding glass doors
- Undercounter models
- Compressor on left (standard) or right (option)
- Optional food storage rated stainless steel interior (NSF-7)

BBC69S-SS-SGD
Shallow depth, stainless steel, sliding glass doors, pass-thru

INNOVATIVE DESIGNS FOR YOUR FOODSERVICE NEEDS

Continental
Refrigerator

Overview of Back Bar Coolers

Widths (Undercounter models countertops have a 3/32" overlap on both sides)

Depths - Hinged Doors (Shallow Depth or Pass-Thru not available on 24" models)

Depths - Sliding Glass Doors (Sliding Glass Doors not available on 24", 79" or 90" models)

Door Styles (59" model shown below, all glass is double pane, tempered Low-e)

Standard Features

Performance-rated, **front breathing** refrigeration system (except 24" models)

Environmentally-safe R-134a refrigerant

High density, non-CFC polyurethane foamed-in-place insulation

Exterior Cabinet Finishes

Standard Models:

Wear resistant, textured baked enamel finish (black)

SS Models:

Stainless steel

Heavy-duty galvanized interior side panels and top, stainless steel interior back and reinforced stainless steel floor

BBC - stainless steel countertop
BBUC - aluminum subtop

Stainless steel reinforced threshold

Full length, extra large coil

Heavy-duty, epoxy-coated steel shelves

Easily accessible and serviceable slide-out condensing unit

Readily removable front, rear and side venting louvered grills

Automatic, energy-saving, non-electric condensate evaporator

Cylinder-keyed security lock (each hinged door only)

Magnetic snap-in door gasket (each door)

5" casters (24" models only)

Interior lighting

Interior light (solid door models, except 24")

LED light (glass door models)

Heavy-duty bottle cap opener with removable cap catcher

Heavy-duty, epoxy-coated, adjustable steel wire storage bin dividers

Stainless steel slide lids

Cold, Frosty and Ready for Service

Bottle coolers have two available temperature options, 38°F, and for a deeper CHILL, 32°F, perfect for higher ambient establishments for that “cold beer” taste. Our Glass & Plate Chillers will maintain 0°F for fast frosting of wet or dry glasses.

Bottle Coolers

- 5 sizes ranging from 24" - 95"

Glass & Plate Chillers

- 3 sizes ranging from 24" - 50"

Optional caster sizes, lid locks
stainless steel interior

Options & Accessories

Keg Coolers

Single, dual & triple angle faucets
Faucet lock

Keg Coolers & Back Bar

Epoxy-coated steel shelves (additional on BBC/BBUC)
Stainless steel shelves
Wine rack
Remote models
Expansion valve system
Casters or legs
Automatic, electric condensate evaporator (except 24" models)
Condensing unit left or right

Back Bar Coolers

Food storage rated stainless steel interior (NSF-7)
Sliding glass door lock
Stainless steel subtop (Undercounter models)

Bottle Coolers

Lid locks
Wire bin dividers

Faucet lock

Wine rack

Wire bin dividers

Lid lock

Modification Suggestions

Like our entire product line, Continental Refrigerator's Bar Equipment can be modified to meet your bar establishment needs. A few examples are shown below. Please consult factory for additional modifications.

INNOVATIVE DESIGNS FOR YOUR FOODSERVICE NEEDS

Continental
Refrigerator

Superior Built Back Bar Equipment

Designed to maintain NSF-7 temperatures in 100°F ambient.

Continental Refrigerator engineers and builds our Bar Equipment to meet the most stringent specifications demanded by consultants and service operators. All cabinets are constructed of top quality materials and components, attributing to their genuine ruggedness and durability. Bar Equipment is designed with enhancements to endure everyday use in harsh bar operating environments.

Prior to factory shipping, all models are performance-run tested for a minimum of 12 hours, providing a highly sophisticated temperature analysis recording, exclusive to each individual cabinet. This recording is then supplied, along with the unit's operation manual, for the customer. A final leak test, vibration check, noise level and visual examination is made by our quality control team, to assure a superior product is shipped from our factory.

Front Breathing Air Flow

Intake air is drawn through the louvers at the bottom half of the front grill, and then through the condenser coil. In cases where the rear of the unit is blocked, the air is forced to discharge through the holes at the top half of the front grill.

View of front breathing air flow on BBC/BBUC/KC models

Specialty Model BBUC24S-SS-D

Our compact, front breathing Cocktail Undercounter refrigerator packs alot of punch. Eliminates the need for storing messy open containers of cocktail mixes and fruits behind back bar units and bar counters, provides cleaner marketability of beer/wine in display units and potentially minimizes fruit fly problems. Ideally this unit is located under the front bar at blender stations serving a large volume of cocktail or smoothie drinks.

STAINLESS STEEL EXTERIOR	EXTERIOR DIMENSIONS INCHES W x D x H	CAPACITY BTU/HR*	H.P.	VOLTS	SHIP WEIGHT
BBUC24S-SS-D	24 x 25 7/8 x 39 1/2	1620	1/5	115-60-1	340

*BTU/HR Rating @ +25°F, 90°F ambient. 10 ft. cord and plug attached.
