

Paraclipse®

INTRODUCING

The **BLACKED OUT SERIES**

ULTRA II

In comparison of similar units, the ULTRA II provides the largest uninterrupted reflective UV light on the market today! Our amazing, patented 60-day auto-advance **CAPTURE CARTRIDGE™** is what makes our Insect Control Systems so effective!

The cover discreetly keeps trapped flies out of site as they accumulate on a pheromone enhanced adhesive strip that is automatically wound within a cartridge for 60 days!

Paraclipse offers a **NO TOUCH** solution to removing the trapped flies from the unit. Unlike glue boards, the **CAPTURE CARTRIDGE™** enables the user to remove the cartridge without touching the adhesive strip or the encased flies!

FLY PATROL

The Fly Patrol is a remarkably versatile decorative fly control system. Beautifully designed, it is powerful enough for commercial use in areas up to 1,000 square feet. The unique design allows the Fly Patrol unit to be wall mounted or placed on a flat surface. Like all Paraclipse units, it uses special UV light, attractants and decoys on the trapping surface to lure and capture flies.

It's small size blends into any décor, and features a 30-day auto-advance **CAPTURE CARTRIDGE™**.

Fly Patrol
Decorative Home Fly Control System

Fruit Fly Patrol™

FRUIT FLY PATROL

Paraclipse offers the only Illuminated Insect Control System that is designed specifically to capture not only Fruit Flies, but other common small flying insects such as Drain Flies and Gnats too!

The engineered attractant and the proprietary UV light are specifically designed to meet the intensity preference of the fruit fly. It's remarkably effective in areas such as Bars, Micro-Breweries, Wineries, Delis, and other food prep-and-serve establishments.

Paraclipse is proud to offer Illuminated Insect Control Systems that meet USDA & FDA guidelines!
