

Not all whiteboards are created equal

Let us help you determine the right board for your needs!

Which performance factors are most important to you?

1. Initial Cost

When weighing initial cost vs. product performance and lifespan, which best describes you?

MAXIMUM LIFESPAN + PERFORMANCE

VALUE + PERFORMANCE

MOST ECONOMICAL

2. Surface Performance

In a week, how often do you use a whiteboard?

FREQUENTLY – EVERYDAY

OCCASIONALLY – SEVERAL TIMES A WEEK

RARELY – A FEW TIMES A WEEK

3. Time / Maintenance

Some whiteboards require more maintenance than others. How much time do you want to allocate?

MINIMAL MAINTENANCE

OCCASIONAL MAINTENANCE

MAINTAIN REGULARLY

Did You Know

1. If ink remains on the board 24/7, then that is HEAVY usage, even if only changed once a week, such as in restaurants.
2. EVERY WHITEBOARD NEEDS CLEANING. The better the surface, the less cleaning required.
3. Porcelain surfaces are ALWAYS magnetic, but magnetic surfaces are not always porcelain.
4. Board design and frame color aesthetics are often important to match the environment in which they are placed.
5. NOT ALL DRY ERASE MARKERS PERFORM EQUALLY. Some are more difficult to erase than others, which results in stains and ghosting. Low-odor, Quartet EnduraGlide® markers optimize performance by always providing a bold mark and excellent erase ability.
6. ERASERS SHOULD BE CLEAN! A “dirty eraser” will often spread ink residue all over the surface.
7. Industrial-strength cleaning solutions can damage a board’s surface.
