The SelfCookingCenter®. The perfect centerpiece for all American kitchens.
Ideas change the world.

Your ambitions are what drives us.

Our promise to you:
We will utilize all of our resources to concentrate on turning your ideas into reality.
It has been our mission to offer you the most beneficial cooking solution for your kitchen for more than 40 years. This is why we work closely with our customers, chefs, and nutritionists to precisely understand the particular needs of American commercial kitchens.

The SelfCookingCenter® is a tool with which you can turn your ideas into reality. One with which your food always turns out the way you want it. A tool that is easy to use and relieves you from routine tasks, so that you can focus on the day-to-day requirements of your kitchen with less stress and hectic rush. And one that at the end of the day pays off.

It all began with the idea of combining steam and hot air in a single appliance. So we developed our first combi-steamer in 1976, and we have been continuously working to improve it ever since. However, that was not enough for us. We wanted to create an appliance which could prepare virtually all of the world’s dishes. The perfect assistant for day-to-day kitchen operations. You are able to save time, money, and space, and have the ability to prepare your dishes how and when you want them.

With our modern networking solution, ConnectedCooking, you’ll have everything under control as well: central unit management, cooking program distribution capabilities, HACCP documentation, remote control via smartphone (iOS and Android devices), and many other functions. You can have all notifications sent wherever you like in real time, so you’ll always know what’s going on.
Ideal for any professional kitchen. 
Recommended by satisfied customers.

In the past, chefs used to need traditional appliances, like convection ovens, steamers, boilers, pots, or frying pans along with a lot of time and effort to prepare a good meal. The SelfCookingCenter® is currently the only appliance with which any kitchen can prepare a complete menu.

On a footprint of roughly 11 ft² (1 m²), you can fry, roast, grill, steam, poach, bake, and much more. It can do that regardless of whether you want to prepare meat, fish, poultry, vegetables, egg dishes, baked goods, or desserts - whether it is thirty or several thousand meals.

It brings the support any kitchen team would wish for: it cooks quickly, is easy to use, provides the food quality you specify, and even saves you money, time, and energy. It does all of the monitoring and checking for you. It sets the temperature, humidity, and cooking time by itself. It monitors the cooking climate and the browning, and even saves you from having to flip or turn items, such as pan-fried foods.

With over 750,000 appliances on the market, 35,000 in the US alone, our appliances have become a standard feature in professional kitchens around the world. What we're particularly happy about is that 93% of our US and global customers attest that RATIONAL offers maximum customer benefit (TNS Infratest 2016 Study). Definitely one reason why almost all of them would also recommend RATIONAL.

The combination of heat and steam in one single appliance offers you new possibilities when it comes to the professional preparation of food. You are able to provide healthy and nutritious meals due to the food being cooked gently. The SelfCookingCenter® covers up to 95% of all the typical cooking applications. You no longer need a traditional steamer or convection oven.

**Powerful steaming**

- Between 85–265°F (30–130°C)

Stewing, poaching, blanching, and steaming – our high-performance steam generator does all of that. Whether its vegetables, fish, or egg dishes, you will achieve intense colors thanks to the precise steam temperatures and maximum steam saturation. The vitamins and minerals are preserved and there is no drying out.

**Convection**

- Up to 85–575°F (30–300°C)

Tender roasts, crispy breaded cutlets, grilled steaks, roasted chicken, and soft baked goods – thanks to sustained convection of up to 575°F (300°C), everything is prepared with consistency, crispiness, and juiciness that sets standards worldwide.

**Combination of steam and convection**

- Between 85–575°F (30–300°C)

The hot and humid climate prevents the food from drying out, minimizes weight loss, and ensures an even browning of roasts, gratins, and bakery products. Plus, the cooking times are much shorter when compared to conventional cooking appliances.

Our SelfCookingCenter® is now also available in a smaller size: the new SelfCookingCenter® XS. For more information, visit our website at www.rationalusa.com and request our SelfCookingCenter® XS brochure.
1,000 American and international dishes.
At the touch of a button.

We have studied the American cuisine extremely closely: we have researched, cooked, eaten, and developed for over 20 years. We have managed to develop a SelfCookingCenter® that can prepare thousands of American and international dishes from around the world simply at the push of a button.

The SelfCookingCenter® also allows you to conjure up culinary delights from Latin America, the Mediterranean, Asia, and much more. Everything is possible.

The 5 senses of the SelfCookingCenter® will support you. They sense the ideal cooking cabinet conditions, recognize the size and quantity of food, think ahead and know how a dish is best cooked, learn which habits chefs prefer, and even communicate with them. Together with chefs, in particular chefs based in North America and our team of cooking experts, nutritionists, physicists, and engineers, we have brought the most important features of a modern cooking appliance to a new standard for American kitchens: cooking performance, food quality, simplicity, and efficiency. A piece of equipment none of our customers can do without.

Overview of advantages:
> Excellent food quality every time
> Easy to operate, even for untrained staff
> Minimal operating costs

RATIONAL VarioSmoker
Give meat, fish, and vegetables a superior smoke flavor and distinctive colors. Now, everyone can smoke in a RATIONAL combi-steamer. Your products will be given a natural smoky flavor, which you can regulate exactly how you like – without needing a smoking chamber. You will be able to produce briskets, ribs, pulled pork, and much more exactly how you want it. The new VarioSmoker makes this possible because it can be used as an accessory in all RATIONAL units built since 1997 (e.g. ClimaPlus Combi®, CombiMaster®, and all SelfCookingCenter® models)². Quick, easy, and cost-efficient.

Up to...
> 96 chickens in 40 minutes
> 330 lb. tender roasts in 60 minutes
> 220 lb. broccoli in 10 minutes
> 320 cookies in 15 minutes
> 10 turkeys in 90 minutes
> 260 lb. spare ribs in 120 minutes
> 80 lb. fries in 15 minutes
> 100 lb. roasted vegetables in 20 minutes

RATIONAL VarioSmoker
The SelfCookingCenter®.
Simplicity and efficiency at the push of a button.

Our motivation was and remains to make your work as easy as possible. That is why we have equipped the SelfCookingCenter® with four intelligent functions and turned it into an assistant that stands for quality, ease of use, and efficiency.

Traditional cooking – manual mode
Of course, you can also operate the SelfCookingCenter® manually. Whether convection, steam, or combination – in manual mode, you regulate all cooking parameters yourself, right down to the exact degree and percentage.

Simplicity through cooking intelligence – iCookingControl
Select product, set desired result – done! iCookingControl prepares your food exactly the way you want it, every time. It does not matter who is using the appliance. It recognizes the size and condition of the products as well as the quantity loaded. It thinks ahead and constantly adjusts and automatically adapts the ideal cooking path to your desired result.

Clever mixed loads – iLevelControl
With iLevelControl, you can prepare different foods at the same time. iLevelControl will show you on the display which dishes can be cooked together, increasing your productivity and saving you time, money, space, and energy. Depending on the load size, quantity, and duration of door openings, it adjusts the cooking time to the relevant food in the best possible way. This means that nothing can be overcooked and the results are always consistent.

Superior quality guaranteed – HiDensityControl
Highly sensitive sensors detect and recognize the current conditions in the cooking cabinet every second. HiDensityControl adapts the energy level precisely to the food requirements and evenly and efficiently distributes the heat throughout the cooking cabinet. The result is healthy, high quality on every single rack with minimal consumption of resources.

Intelligent automated cleaning – Efficient CareControl
Efficient CareControl is the unique automatic cleaning system that detects dirt and limescale and removes them easily. The function adapts to your requirements and proposes the best clean at a given time. The result: sparkling, hygienic cleanliness, and you save on time, preserve the environment, and protect your wallet.
With its sensors, iCookingControl recognizes the size and condition of the products as well as the load size, and adjusts the best path to your desired result depending on the food. It makes all of the necessary decisions and automatically sets the temperature, the cooking cabinet climate, and the cooking time. Every adjustment is shown to you on the display. That way you know exactly what is happening and can keep an eye on it.

iCookingControl also learns from your cooking habits and preferences and adjusts the settings to your requirements. You no longer need to check or monitor anything and everything will turn out exactly how you want it. You can always rely on this chef’s assistant.

Simplify your day-to-day kitchen operations:
> No need to set the temperature
> No need to set the time
> No need to turn the food over

Select your desired result. Load. Done. iCookingControl.
All at the same time and always at the right time.
iLevelControl.

With iLevelControl, you can master à la carte, mise en place, and your breakfast service effortlessly, quickly, and flexibly. In just roughly 11 ft² (around 1 m²) of space, you can combine a variety of different cooking appliances, such as pots, pans, a grill, or fryer, and prepare all kinds of different foods in a single appliance all at the same time.

Your SelfCookingCenter® will show you which foods can be cooked together on the display. You specify what you want to prepare and iLevelControl will monitor each rack individually. According to the load size and how often and for how long the door stays open, iLevelControl intelligently adjusts the cooking time and even informs you of it, so you can always keep an eye on what is happening.

When a dish is ready, iLevelControl will let you know and indicate the corresponding rack on the display. If desired, the system will also illuminate which rack can be loaded or removed. This almost completely eliminates the possibility of operator error. Your food will always be cooked perfectly and exactly how you want it.

“RATIONAL was the first combi oven that I was ever introduced to, and today it is in the center of all of my kitchens. RATIONAL’s combi oven has given us the ability to be dynamic with our dishes and develop a menu that is continually evolving.”

Thomas Keller, Chef and Proprietor of the Thomas Keller Restaurant Group, Napa, CA

Overview of advantages:
> Cook different types of foods at the same time: maximum flexibility and up to 70% in energy savings compared to conventional cooking technology without a combi-steamer
> Monitoring and intelligent adjustment of cooking time: consistent high food quality without checking required
> Displays which foods can be cooked together: easy to use

Mise en place

Breakfast
Superior food quality your customers will remember. HiDensityControl.

Superior food quality can only be achieved if there is always sufficient power, especially when it concerns the preparation of large quantities. This is what the patented HiDensityControl does. It distributes the heat, air, and humidity in the cooking cabinet uniformly and intensively, specifically for the quality and quantity of your products.

Every second, highly sensitive thermocouples detect and recognize the current cooking cabinet conditions, so that the required quantity of energy can be optimally adjusted to the food. This takes place precisely and efficiently. The result: consistent high food quality with minimal use of resources, on every single rack.

Overview of advantages:
- Dynamic air circulation: outstanding uniformity on all levels
- Active dehumidification: crunchy crackling and crispy breaded coatings
- Maximum steam saturation: no drying out, even with delicate foods
- High performance and maximum temperature up to 575°F (300°C): traditional grill pattern, even with large quantities – short preheating times and thus minimal energy consumption

“One of the first groups we cooked for with the SelfCookingCenter® had a total of 110 people. We were able to cook for the entire group in 18 minutes. There really is not anything we cannot do with our RATIONAL.”
Steven Olschewski, Chief Entertainment Officer, Clubhouse Fun Center, Rochester, NY

HiDensityControl: concentrated power

Fresh steam generator: precise steam temperatures and maximum steam saturation guarantees the best possible quality for healthy and nutritious foods, without requiring any costly water softening.

Intelligent climate management: the humidity measurement also takes into account the food’s own moisture and allows the cooking cabinet climate to be set and regulated down to the percent. Perfect for preparing succulent roasts with perfect crusts.

Dynamic air mixing: the high-performance fan wheel intelligently adjusts the speed and rotation direction according to the product, quantity, and cooking level. For optimal air distribution and consistent results.

Active dehumidification: innovative vacuum technology quickly and efficiently dehumidifies the cooking cabinet. For crispy crusts and breaded food items.
Simple to clean. No limescale.
Efficient CareControl.

With Efficient CareControl, the SelfCookingCenter® will automatically clean and descale itself, and also do this unsupervised overnight if desired. Depending on how dirty your unit is, it determines the necessary cleaning level and proposes an optimum dose of cleaning agent and descaler.

If desired, you can save a cleaning time schedule based on your operating hours. The SelfCookingCenter® will automatically signal at the defined times and will always keep your unit hygienically clean and perfectly maintained.

Expensive and high-maintenance water softening is no longer necessary. Efficient CareControl needs roughly 30% less resources than the previous model*. Therefore, this costs much less than manually cleaning traditional appliances, and is also particularly safe due to the use of tabs.

*Pre-2014

> No spraying
> No liquid cleaning agent
> No rinsing
> No cleaning afterwards

Start clean. Insert recommended tabs. Finished.

Overview of advantages:
> Solid cleaning agent: particularly safe to use
> Recognizes the degree of dirt with intelligent cleaning proposal: minimal operating costs and workload
> Automatic descaling: no costs for manual descaling or water softening
> Creation of a customized cleaning plan: cleanliness always guaranteed

“Since the units are self-cleaning, the operation has reduced labor costs by up to 80 to 90%, which allows ample time for creativity and developing new recipes.”
Edward De La Garza, Executive Chef, George R. Brown Convention Center, Houston, TX
Saves you energy, time, raw materials, and space. Pays for itself within one year.

New technology does not always have to mean high investment costs. Our SelfCookingCenter® is no exception: with its enormous power and flexibility, it will yield major advancements for your kitchen, replacing many other appliances, including the convection oven and steamer. It’s worth doing the calculation for yourself.

The rewards of the SelfCookingCenter® are most visible in your kitchen. You save on energy, water, and raw materials, and produce less waste. RATIONAL also frees up to 30% more space as you can replace up to 40 to 50% of all traditional cooking appliances. Our ethos is above all to be there for you when you need us. Our integrated service approach ensures that you get the maximum benefit from our appliances from the start and throughout the product service life.

The average restaurant with 200 meals per day with two SelfCookingCenter® 101 appliances – additional earnings compared to a traditional kitchen without a combi-steamer.

*Compared to a traditional kitchen without a combi-steamer.
Superior quality is our goal.
The right accessory is the perfect partner.

Only by using original RATIONAL accessories can you make full use of the possibilities the SelfCookingCenter® has to offer. This is how you can undertake special applications, such as preparing pre-fried products, roasting chicken and duck, and cooking whole lamb and suckling pig. Even cutlets and steaks can be prepared without time-consuming turning. Original RATIONAL accessories are tailored to your RATIONAL unit. They are extremely durable and thus ideal for daily, hard use in the professional kitchen.

Grill and pizza tray
The excellent heat conductivity of the pizza tray can produce all different types of pizzas, flatbreads, and tarts to a superior quality. Turn it over and vegetables, steaks, and even fish will get the perfect grill pattern.

Diamond and grill grate
Thanks to its innovative design, the new diamond and grill grate offers you two different grill patterns with just one grate. Depending on which side you use, the diamond and grill grate will either give your food the classic grill stripes or the popular original American steakhouse pattern.

Roasting and baking tray
The aluminum baking trays from RATIONAL display excellent non-stick properties, as well as robustness and durability. Bread rolls, Danish pastries, pan-fried food, and breaded products come out perfectly brown and crispy.

Multibaker
The multibaker is perfect for cooking fried eggs, omelets, hash browns, or tortilla española in large batches. The special non-stick coating guarantees that the food will not stick.

CombiFry®
For the first time, it is now possible to prepare large quantities of pre-fried products, such as breaded chicken strips, fries, and wedges without additional fat with the patented CombiFry®. Healthy and delicious.

UltraVent
The condensation technology in the UltraVent hoods absorbs and dissipates steam. Installation is simple and can be retrofitted at any time. There is no need for complicated and expensive installations to remove exhaust air and no need for an extra connection to the outside.

For more information, please request our Accessories brochure or our application manuals, or visit our website at www.rationalusa.com.
Built for the American market.
The difference is in the details.

LED lighting with level indication
The completely new LED lighting provides optimal illumination of the cooking cabinet and of every single tray, from top to bottom and from front to back. The light neutrally reflects the browning of the products. It saves on energy, is durable, and low maintenance. The new lighting concept uses intelligent lighting signals which tray needs to be loaded or unloaded and when. Level indication makes using iLevelControl even easier: a blinking light signals if the load quantity can still reliably identify the coldest point of the core temperature probe. The patented positioning aid facilitates the correct placement of the core temperature probe in liquid and in soft or very small products.

Energy consumption display
You will always know how much energy an individual cooking process requires and how much energy per day has been consumed. The data is visible on the display and can also be downloaded.

RATIONAL
ConnectedCooking
Connecting your RATIONAL units is easy thanks to the world’s most state-of-the-art cloud-based networking solution for professional kitchens. ConnectedCooking helps you keep everything under control: manage your units efficiently, access them remotely via smartphone (iOS and Android devices), document HACCP information automatically, and load recipes from the RATIONAL library onto your units quickly and easily. Learn more at ConnectedCooking.com.

Fresh steam generator
The fresh steam generator is indispensable if you want to achieve top food quality when steaming. The 100% hygienic fresh steam guarantees maximum steam saturation, even at low temperatures, such as when poaching. The steam generator is automatically descended during the cleaning process. This makes expensive water softening measures unnecessary.

ClimaPlus Control®
The humidity is precisely measured using sensors in the cooking cabinet and regulated to one percent accuracy in accordance with specifications. Where required, the system extracts excess humidity or adds extra humidity using the steam generator. Even with larger load sizes, you will get crispy crusts, crunchy breading, classic grill patterns, and juicy roasts.

Centrifugal grease separator system
There is no need to change or clean the grease filters and the cooking cabinet air stays clean. Plus, there is no flavor transfer.

Dynamic air mixing
The heat is always optimally distributed thanks to the specific cooking cabinet geometry and the powerful fan impeller drive, which intelligently adjusts the rotation direction and speed to the relevant cooking cabinet geometry and the powerful fan impeller drive, which intelligently adjusts. The heat is always optimally distributed thanks to the specific cooking cabinet geometry and the powerful fan impeller drive, which intelligently adjusts the rotation direction and speed to the relevant cooking cabinet geometry and the powerful fan impeller drive, which intelligently adjusts.

The extremely robust construction supports temperatures of up to 575°F (300°C) in the cooking cabinet, even in constant operation. Special cooking methods, such as grilling or searing, are not a problem, even with large quantities of food.

Sheet pan adapter
A flexible pan adapter is available for the American market. The adapter allows for flexible loading of full size sheet pans, hotel pans, and mixed loads. Easy and safe loading with maximum flexibility (for the 62 and 102 models only). A 7-rail hanging frame is also available. The load quantity can also be increased for special applications.

Intelligent 6-point probe
Even if the core temperature probe is not inserted correctly, the probe can still reliably identify the coldest point in the food, ensuring that all products are always cooked perfectly.

Positioning aid
The patented positioning aid facilitates the correct placement of the core temperature probe in liquid and in soft or very small products.

Whether for thirty or several thousand meals, you’ll always get the right SelfCookingCenter® – now also available in a smaller size as the SelfCookingCenter® XS. There is space for it in every kitchen, and its clever installation solutions also make it suitable for front of the house cooking areas and as a station unit.

The SelfCookingCenter® XS is only available in the electric version. All other models are also available as gas versions. The dimensions, features, and performance are identical for both variants. There are also numerous special versions available, with which we tailor your appliance to the requirements of your kitchen.

By stacking one appliance on top of another as a Combi-Duo, you get even more flexibility without any additional space needed. You can simply and conveniently control the lower unit using the upper control unit.

For more information, please request a copy of our Units and Accessories Catalog. In addition to the SelfCookingCenter®, we also offer our CombiMaster® Plus in thirteen different versions. For detailed information, please request our CombiMaster® Plus brochure or visit our website at www.rationalusa.com.

XS and 202 electric are not ENERGY STAR® certified.
Advice and design
We will visit your kitchen, observe your operation, and work closely with you to develop a solution that is tailored to your needs. For more information, please call us at 888-320-7274.

Test to buy
Experience the SelfCookingCenter® in your kitchen before purchasing. Give it a try before you buy!*  

North America Distribution Center
With 80,000 square feet and 14 functional loading docks, RATIONAL USA’s North America Distribution Center maintains a constant flow of inventory, which includes units, accessories, spare parts, and more. The distribution center is located in Elgin, IL and works closely with its 3rd party shipping carriers to ensure a timely and positive experience.  

* Test to buy is not available for the XS model.

Total Freight Solution Program – Superior service from door to door
One way we deliver superior service is by offering our customers a Total Freight Solution Program for all units ordered. This means that all orders with units will receive free freight during their 1st leg of delivery.  

RATIONAL Certified Installation
RATIONAL has an extensive network of RATIONAL Service Partners that are trained on how to properly install your piece of equipment. RATIONAL offers two Certified Installation options to choose from, an installation with a Pre-Inspection Site Survey or one without. Pre-Installation Site Survey ensures that the site has the proper space and connections for gas, electric, drain, and water.

Commissioning Program
Should you choose to assume the responsibility of the installation, we offer a no-charge Commissioning Program to ensure that your RATIONAL unit is installed properly.

Software updates
We even include free software updates, so that you can benefit from our cooking research specialists’ latest findings. Now, your SelfCookingCenter® will always be on the cutting edge of technology. RATIONAL ConnectedCooking can even make it happen automatically. Just start the update process – the unit will take care of the rest.

Chef Assistance (Initial End User Team Training)
After your RATIONAL has been successfully installed, we provide free Chef Assistance. RATIONAL Certified Chefs will come to your kitchen and help you and your team become familiar with your new equipment.

Academy RATIONAL (Advanced Team Training)
We also offer advance training for you and your team members if you are looking to get more out of your RATIONAL equipment. Register for one of our free seminars at www.rationalusa.com.

RATIONAL ConnectedCooking
The Internet platform for professional kitchens. Networking your units is easy, and allows you to benefit from a wealth of additional features, such as simplified unit management, smartphone-based remote control functions (iOS and Android devices), easy transmission and management of cooking programs, and automatic HACCP documentation. Find new inspiration in our extensive recipe library containing thousands of international dishes, and then load them into your units with a click of your mouse. Rounding out the selection: a wealth of expert tips, suggestions, and videos on optimizing your kitchen. And of course, the whole thing is available via mobile app as well, and meets the highest security standards. Just register for free and start reaping the benefits: ConnectedCooking.com.

ChefLine
If you have application or recipe questions, we provide support 365 days a year. You can reach the ChefLine at 866-306-2433. Fast and easy support – from one foodservice professional to another.

RATIONAL USA/Canada Training App
Simply select what you want to learn and enjoy! The new training app offers an array of benefits, such as application and instructional videos, manuals, brochures, spec sheets, contact information, and much more. Available on the App Store or Google Play for free. Just search RATIONAL USA/Canada Training App and download.

RATIONAL Service Partners
Our professional and responsive network of RATIONAL Service Partners provides swift and efficient help locally. Each factory-certified technician is trained annually on our equipment in order to better support you. We have a guaranteed spare parts supply and emergency coverage after normal business hours and weekends. You can contact your RATIONAL Service Partner or call our 24/7 hotline at 866-891-3528.

Planned Maintenance Packages
In addition, RATIONAL Service Partners offer Planned Maintenance Packages in order to help maximize your return on investment from the very start.

For more information, please request a copy of our CustomerCarePlus and ConnectedCooking brochures, or visit us online at www.rationalusa.com.
Seeing is believing!
Come cook with us.

The RATIONAL CookingLive culinary events give you the opportunity to see our technology in action. You will be able to taste the quality of the food being cooked, test the ease of use, experience the versatility, and much more. Last year, more than 3,500 attendees cooked with us at over 200 sites across the US and learned, first-hand, about the benefits of our technology.

Experience the high-performance SelfCookingCenter® for yourself and visit one of our free RATIONAL CookingLive events at a location near you. We host over 1,000 events in the US every year. Register today at www.rationalusa.com. We look forward to seeing you at our next event!

In addition, we have informational brochures for the following operations:
> Restaurant
> Hotel
> Casual dining
> School
> Supermarket
> And much more

You can also find more information online at www.rationalusa.com.

"I was so impressed by the performance of the SelfCookingCenter® in my restaurants’ kitchens and could not imagine designing my ideal kitchen without one."
Barbara Lynch, Founder & CEO, Barbara Lynch Gruppo, Boston, MA
