

Depository Safes

Depository safes or drop safes are an important tool in safe guarding cash from thieves and/or employees. Instead of leaving large bills and extra cash inside the register, simply drop the items of value into the access portal in the safe where it stays safely out of reach. This makes dropping items into the safe simple for businesses that need to protect their deposits before they need to go to the bank. To prevent someone from fishing out money or deposit bags with a tool or a coat hanger the large and standard models feature anti-fishing baffles and jagged edge teeth on the door drop slot which prevents item from being fished back out. The compact model features an easy access deposit slot that makes it easy to slide items into the safe. In the situation that years have passed and the batteries need to be replaced or have forgotten the numeric key codes, back-up keys are included with Barska safes.

Features

- Retains Two Pin Codes
- Two Solid Steel Locking Bolts
- Lock Out Mode
- Pre Drilled Mounting Holes
- Operates On 4-AA Batteries (Included)
- Includes Protective Floor Mat Ensuring That Items Are Not Scratched, Set Of Emergency Back-Up Keys And Mounting Hardware
