# NATURAL KRAFT PAPERBOARD: AN ENVIRONMENTALLY RESPONSIBLE SOLUTION TO PACKAGING

All of our Kraft paperboard is made from a combination of **sustainably managed forests** and at least **18% recycled wood fiber content** using a totally chlorine free manufacturing process.

An all new, **all Kraft** line offered by Southern Champion Tray

**PAPERBOARD:** Paperboard is made from trees, a natural resource that can easily be renewed by planting more trees. Trees used in our paperboard are typically harvested and re-grown on a 7 – 15 year farming cycle depending on the type of tree. This process is the same for any other farm crop, it just occurs over a longer period of time.

**KRAFT PAPERBOARD:** Our Kraft paperboard is made from unbleached pulp and is highly recyclable in its most natural state; however, even coated Kraft paperboard can be recycled with the proper equipment. Paper fibers can be recycled 5 – 7 times before deteriorating, and all of our Kraft paperboard contains a percentage of recycled content. Once fibers are completely worn out, they are used as a biofuel. Naturally, Kraft should be the number one choice for your bakery and foodservice items... and for our environment.
