

Super Erecta® **HOT**
Heated Shelving

Super hot. Super flexible.

Shelving that keeps food hot, appetizing & ready-to-go.

Super Erecta® HOT is a super flexible and efficient way to **keep food hot while preparing, serving, staging or holding hot food items**. This convenient solution allows you to add heat to any Super Erecta storage unit or workstation. Each shelf is self-contained with an adjustable thermostat to control temperatures up to 200°F (93°C).

Set-it-up your way.

Build into any Super Erecta shelving unit or workstation.

Customize your spacing with adjustable shelves.

Adjustable in 1" increments (25mm)

Super-flexible.

The possibilities are endless.

BONUS
Every shelf includes
4 counter-top feet.

Use as stand alone
heated counter-top unit...

Set-up as multi-tiered heated
holding unit...

Combine an enclosure kit with
standard shelving...

...or, integrate components
into a workstation.

Built to last.

Made of high quality, Type 304 stainless steel with an aluminum inner core for consistent, reliable radiant heat. Adjustable thermostat, 200°F (93°C) maximum surface temperature.

Low wattage design, 200W to 800W per shelf.
Fit up to 9 shelves on a single 15AMP circuit.

Enclose it.

Efficient enclosures kits.

Full window, durable polycarbonate sliding doors are great for back-of-house and front-of-house customer facing applications.

- Maximize holding time
- Increase safety & security
- Improve visibility & merchandising

Cleaner touchpoints.

Microban antimicrobial protection is built into the door handles to protect from bacteria growth and keep the handles "cleaner between cleanings".

PROTECTION THAT LIVES ON
MICROBAN

We put space to work.
