

**BUNNlink = Knowledge → Knowledge = Profits**

*BUNNlink is a continuous monitoring and feedback system that collects, analyzes and communicates data from critical electronic components to maximize equipment operation and functionality, provide faster service response time and maximize profits.*

### **Trend Analysis and Inventory Management**

- Charts beverage production by hour, day, week and month to track trends in beverage usage
- Manage, select and reduce beverage inventory by tracking production by flavor or brand
- Out of product detection sends out an immediate notification (available on some equipment)

### **Service Management**

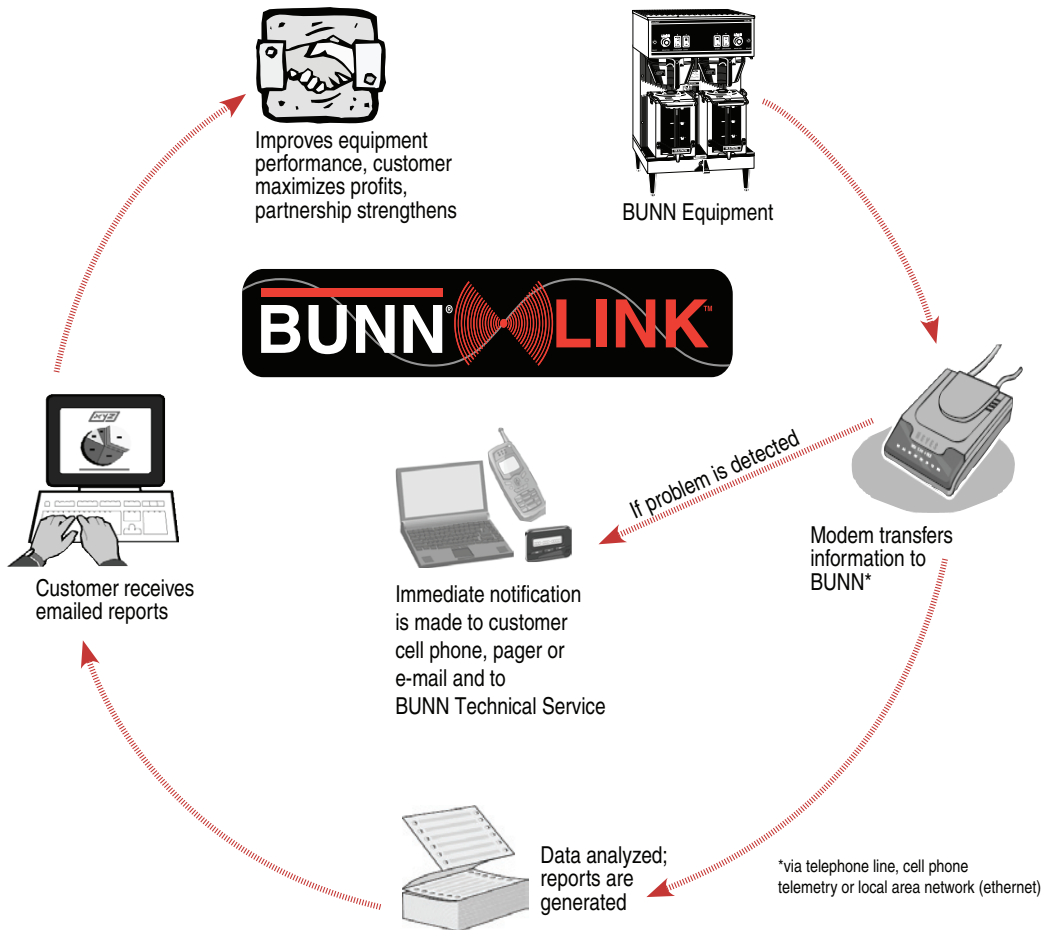

- Monitors beverage equipment to deliver immediate notification of issues and failures to your notification list and BUNN Technical Service, who can assist you in order to reduce downtime
- Service and usage data will indicate any non-critical developing problems allowing you to schedule service or usage based preventive maintenance at your convenience
- Remote automatic software updates to keep equipment running with latest revision
- Track assets by serial number and store location

### **Beverage Quality**

- Monitors beverage temperatures (cold and hot) to assure optimal beverage production thus encouraging repeat sales
- Reports production frequency to show product hold times to ensure freshness
- Assists in collecting and recording data for HACCP reporting

### **Energy Management**

- Track when equipment could benefit from entering into energy saver mode
- Verify equipment is entering into energy saver mode thus saving you energy costs

## How to Get Started Using BUNNlink:

BUNNlink is compatible with many BUNN families of equipment including iMIX®, Ultra™, Soft Heat® and ThermoFresh® BrewWISE®, G9-2T and MHG BrewWISE, ITCB, ICB, Liquid Coffee, JDF Silver Series®, Mix and Match (SLCC), AXIOM®, BUNN Espresso® Tiger, and Titan™.

Contact your local BUNNserve or sales representative to discuss specific BUNNlink application and compatibility requirements and how BUNNlink can increase sales and profits.

## BUNNserve
