

How to Handle and Care for Your American Metalcraft Product

Wood Peels

Preparation:

To seal, wipe with food safe oil like mineral oil on the surface of the peel.

Washing:

Hand wash with a soft cloth and dry thoroughly.

*Note: Do not expose the peel to a dishwasher, abrasive sponges, caustic cleaners, or acidic detergents.

Daily Care Notes:

- Never allow the peel to be soaked in water.
- Avoid leaving the peel on hot surfaces. This increases the chance of warping.
- If the peel warps, leave overnight with the warp facing up and it should flatten out.
