## Sani Station Sanitizer & Cleaner

As the [Centers for Disease Control explains](#) in this link, there are several different Human Coronavirus strains in the world - the latest one being COVID-19.

Sani Station Sanitizer & Cleaner was used in a non-GLP test by an independent U.S. laboratory and was found to kill 99.97% Human Coronavirus VR-740 on a hard surface. This laboratory test was done using a spray / wipe method with a 30-second contact time between the two actions at 199ppm available chlorine.

What this means:

- Sani Station Sanitizer & Cleaner is effective at killing 99.97% of Human Coronavirus VR-740 under the conditions stated above. We did not test against COVID-19 (SARS-CoV-2). This novel virus is not currently commercially available for efficacy testing.
- Sani Station Sanitizer & Cleaner is intended for use as a cleaner/sanitizer product. As a chlorine-based sanitizer, our product falls under CFR Title 40 Section 180.940 – CAS Reg. No. 7673-09-8. Our product is also NSF Listed as a D2 category No Rinse sanitizer.
- When properly diluted, Sani Station Sanitizer & Cleaner will address all-purpose cleaning & sanitizing needs in both food/non-food applications. **Our directions of use require a 60 second contact time for sanitizing.**
- We are in the process of GLP testing for COVID-19 so that we can join the EPA disinfectant list.
- CFS Brands is the supplemental distributor (#92098) of Sani-Station Sanitizer & Cleaner. The Purdy Products Company (EPA registration #178-9) is the master label registered company, who produce Stera-Sheen Green Label Sanitizer & Cleaner. It is approved for export to Canada, Australia, and New Zealand.
