

MELAMINE USE & CARE

GENERAL CARE

All Elite Global Solutions melamine must be handled as any other quality dinnerware and serveware.

For best results, use only non-abrasive plastic pads or a plastic type bristle to clean or remove dried food. Harsh or abrasive cleaners, steel wool or metal scouring pads are not recommended for melamine products.

Melamine is commercial dishwasher safe. However, avoid use of chlorine, chlorine based detergents, or bleach. Please consult your chemical specialist for the best solution made specifically for use on melamine and other plastic products.

Pre-soak melamine products, if necessary, in a high quality pre-soak dishwashing detergent.

Serrated knives will damage products over time.

Oven or microwave use is not recommended.
