

# Stainless Steel Foil and Film Dispenser/Cutter SAFETY AND INSTRUCTION SHEET

#176FM12DISP • #176FM18DISP • #176FM24DISP

## CAUTION

**THE SERRATED BLADE IS EXTREMELY SHARP. PLEASE USE CAUTION AND KEEP YOUR HANDS FREE OF THE BLADE WHEN USING THE DISPENSER.**

- This dispenser and cutter is dual purpose. Use the serrated blade for quickly dispensing and cutting film or foil, or simply attach the recommended safety slide cutter for optimal accuracy when cutting film and to help eliminate accidental cuts or injuries.
- This product can be used on a stainless steel work table with the use of the attached suction cups, or can be mounted on the wall (see below for instructions).
- If your box of foil includes a serrated edge or cutter, close the cardboard flap over this portion before placing the box in the dispenser.
- This product accommodates film rolls up to 3000' or foil rolls up to 1000'.

## TO CUT FILM WITH PVC SAFETY SLIDE CUTTER

1. For added safety and precision, we recommend using the safety slide cutter when cutting film.
2. Align the safety slide cutter over top of the serrated edge, with the slide tab upwards.
3. Press downwards one side at a time, working the safety slide cutter on top of the serrated blade until it is fully attached, making sure to keep your hands free of the sharp edge.
5. Push the slide tab to one side of the cutter.
6. Place the item you wish to wrap directly in front of the dispenser, closest to the blade side.
7. Pull a section of film straight up and out of the box, holding each corner.
8. Applying gentle but steady pressure, move the slide tab from one side of the cutter to the other.

## TO CUT FOIL OR FILM WITH SERRATED BLADE

1. To cut foil or film with the serrated blade, make sure the safety slide cutter is off.
2. Place the item you wish to wrap directly in front of the dispenser, closest to the blade side.
3. Pull a section of foil/film straight up and out of the box, holding each corner, and keeping your hands and arms away from the sharp blade.
4. Angle the foil/film upwards as you pull to keep it free of the serrated edge.
5. Holding onto either side of the foil/film, pull towards one side and apply pressure downwards, pushing the foil/film into the sharp edge.

## WALL MOUNT INSTALLATION

To wall-mount this item, install your mounting hardware and hang by lining up the pre-drilled holes on the back of the dispenser. Keep hands away from sharp blade when transporting and mounting dispenser.
