LXeR Undercounter Warewasher

A warewasher that fits your needs.

Steam elimination

The Advansys LXeR includes Hobart-exclusive Energy Recovery technology. This advanced feature recycles hot water vapor produced during the wash and rinse cycle and uses it to preheat cold inlet water. Energy Recovery saves you not only energy, but also reduced steam released into the air, improving both the operator and customer experiences.

Three cycles

With the Hobart Advansys LXeR operators can choose from three different cycles—light, normal and heavy. Three cycles give operators the flexibility to clean lightly soiled ware quickly and still keep up during high-demand times. Additionally, the heavy cycle carries the NSF certification for cleaning pots and pans.

Lower water consumption

The Hobart LXeR is built from the ground up to save water and uses only .62 gallons per cycle.

Sense-a-Temp™ booster heater

The Advansys LXeR is equipped with Hobart-exclusive Sense-a-Temp booster heater technology, capable of delivering a 70°F rise in rinse-water temperature and ensuring your ware is properly cleaned and sanitized at 180°F.

Automatic delime cycle

The Advansys LXeR model comes equipped with a delime pump, which automatically releases the required amount of deliming agent into the machine. This automatic cycle removes lime scale from the booster and the wash chamber.

Model LXeR

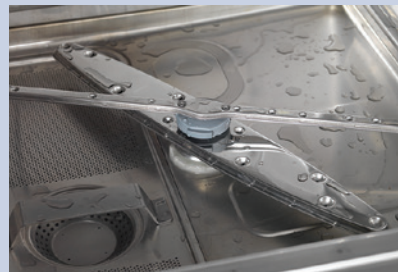

QUICK FACTS

- > ENERGY STAR® qualified
- > Energy Recovery technology to save on energy costs up to \$485 per year*
- > Improved Smart Display, such as clogged wash arm notification, keeps operators informed without the use of error codes
- > Three cycles: light, normal and heavy
- > NSF Certified to clean pots and pans (LXeR heavy cycle)
- > Includes Hobart Service start-up & site water hardness testing to set Auto-Delime

*Based on 60 cycles per day.

The inside of each LXeR machine is angled to direct food debris into the improved strainer system. This extra-deep strainer system keeps debris from entering the pump and motor area, preventing damage and costly maintenance.

The LXeR features redesigned, easily removable wash arms—useful for easily clearing clogs, should it ever be necessary.
