

ADVANSYS™ LXGe GLASSWASHERS

Let your drinks shine through with the glasswashers that eliminate chemical residue.

Here's to higher standards.

"We have definitely upgraded our beer and wine lists ... the presentation of the beer glass is hugely important to us."

> > > Elegance. Craftsmanship. Sophistication. Your customers expect more from their drinking and dining experiences these days as they fill their glasses with craft beers, handcrafted cocktails, boutique wines and specialty nonalcoholic beverages.

Chemical residue: The unwelcome finish.

Likewise, you want your establishment known for its signature beverages—drinks that keep your customers coming back for more. However, if you're serving your beverages in glasses that have been cleaned by traditional glasswashing methods, your customers may remember your drinks for all the wrong reasons.

That's because while three-compartment sinks and traditional dishwashers will clean and sanitize your glassware, they also leave behind a chemical residue that your customers can see—and sometimes taste. Then, you're at risk of putting all the time and work into your beverages right down the drain.

Now Hobart has a solution that helps you bring out the best in your beverages.

The all-new Advansys™ LXGe glasswashers clean and sanitize glassware with no chemical residue. The LXGeR high-temperature machine eliminates the need for chemical sanitizers, while the LXGePR low-temperature machine uses potable water to rinse off chemical sanitizers.

> The secret to sensational ... starts with a clean glass.

Raise your glass to the new Advansys LXGe glasswashers.

> > >

Both glasswashers are ENERGY STAR® qualified, with easy, one-button operation and a special “Soft Start” feature that protects glasses from chipping and breaking. With two available heights, compact design and high-end appearance, the Advansys LXGe glasswashers are an easy fit—even in the most exclusive establishments.

> Eliminate ...

- Chemical residue
- Chemical smells
- Off-putting steam

LXGeR

- High-temperature washing from cold-water supply
- Eliminates the need for chemical sanitizers
- ENERGY STAR® qualified with Energy Recovery system that eliminates steam

LXGePR

- PuriRinse system uses potable water to rinse off sanitizers
- ENERGY STAR® qualified with low-temperature washing

Better drinks. Better business.

Whether they're wine enthusiasts, cocktail lovers or craft-beer connoisseurs, your customers are in continual pursuit of the perfect glass—the beverage that becomes an experience. Now you can be sure in knowing that nothing will get in the way of your customers enjoying the pure taste and care you pour into every glass.
