Re: Customer Questionnaires

To Our Valued Customer,

Peanuts are a gluten free product. Jimbo's Jumbos peanut butter, granulated peanuts, roasted and salted in-shell peanuts, and oil roasted peanuts with and without salt are all gluten free.

The American peanut Council (APC) has released a statement addressing Genetically Modified Organisms (GMO). Although research is being conducted, peanut varieties developed through biotechnology will not be available for cultivating and sale until research demonstrates that all concerns regarding safety, wholesomeness and commercial viability are satisfied.

For more information you can visit the National Peanut Board web site:
