

Mounting Track Ordering Instructions

1. After determining the style and number of heat lamps and mounting track segments you wish to purchase, select the desired Mounting Track **and** Track Fitting options from the Accessory & Option dropdowns on the heat lamp product page. **Note:** A track fitting is required for every lamp you wish to track mount.
2. Adjust the purchase quantity next to the Add to Cart button to **match the number of mounting track segments** you will be purchasing, and then add the heat lamp and accessories to your cart.
3. Return to the heat lamp product page by clicking the item title in your shopping cart, or by entering the item number into the search bar.
4. Select your desired Track Fitting option from the dropdown again, **leaving the Mounting Track dropdown unselected** this time.
5. Adjust the purchase quantity to match the number of lamps you still need to purchase, and add them to your cart.

Below is an example of how your cart should look if you wanted to purchase **4** of item 404100CBLK, with **1** mounting track segment and **4** track fittings. The same process can be used to order any uneven combination of lamps and mounting track segments.
