To ensure you have the latest revision of the Operating Manual, or to view the Illustrated Parts Catalog, Programming Manual, or Service Manual, please visit the Bunn-O-Matic website, at www.bunn.com. This is absolutely FREE, and the quickest way to obtain the latest catalog and manual updates. For Technical Service, contact Bunn-O-Matic Corporation at 1-800-286-6070.
BUNN-O-MATIC COMMERCIAL PRODUCT WARRANTY

Bunn-O-Matic Corp. (“BUNN”) warrants equipment manufactured by it as follows:

1) Airpots, thermal carafes, decanters, GPR servers, iced tea/coffee dispensers, thermal servers and ThermoFresh® servers (mechanical and digital) 1 year parts and 1 year labor.

2) All other equipment - 2 years parts and 1 year labor plus added warranties as specified below:
   a) Electronic circuit and/or control boards - parts and labor for 3 years.
   b) Compressors on refrigeration equipment - 5 years parts and 1 year labor.
   c) Grinding burrs on coffee grinding equipment to grind coffee to meet original factory screen sieve analysis - parts and labor for 4 years or 40,000 pounds of coffee, whichever comes first.

These warranty periods run from the date of installation BUNN warrants that the equipment manufactured by it will be commercially free of defects in material and workmanship existing at the time of manufacture and appearing within the applicable warranty period. This warranty does not apply to any equipment, component or part that was not manufactured by BUNN or that, in BUNN’s judgment, has been affected by misuse, neglect, alteration, improper installation or operation, improper maintenance or repair, non periodic cleaning and descaling, equipment failures related to poor water quality, damage or casualty. In addition, the warranty does not apply to replacement of items subject to normal use including but not limited to user replaceable parts such as seals and gaskets. This warranty is conditioned on the Buyer 1) giving BUNN prompt notice of any claim to be made under this warranty by telephone at (217) 529-6601 or by writing to Post Office Box 3227, Springfield, Illinois 62708-3227; 2) if requested by BUNN, shipping the defective equipment prepaid to an authorized BUNN service location; and 3) receiving prior authorization from BUNN that the defective equipment is under warranty.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER WARRANTY, WRITTEN OR ORAL, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF EITHER MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

The agents, dealers or employees of BUNN are not authorized to make modifications to this warranty or to make additional warranties that are binding on BUNN. Accordingly, statements by such individuals, whether oral or written, do not constitute warranties and should not be relied upon.

If BUNN determines in its sole discretion that the equipment does not conform to the warranty, BUNN, at its exclusive option while the equipment is under warranty, shall either 1) provide at no charge replacement parts and/or labor (during the applicable parts and labor warranty periods specified above) to repair the defective components, provided that this repair is done by a BUNN Authorized Service Representative; or 2) shall replace the equipment or refund the purchase price for the equipment.

THE BUYER’S REMEDY AGAINST BUNN FOR THE BREACH OF ANY OBLIGATION ARISING OUT OF THE SALE OF THIS EQUIPMENT, WHETHER DERIVED FROM WARRANTY OR OTHERWISE, SHALL BE LIMITED, AT BUNN’S SOLE OPTION AS SPECIFIED HEREIN, TO REPAIR, REPLACEMENT OR REFUND.

In no event shall BUNN be liable for any other damage or loss, including, but not limited to, lost profits, lost sales, loss of use of equipment, claims of Buyer’s customers, cost of capital, cost of down time, cost of substitute equipment, facilities or services, or any other special, incidental or consequential damages.

INTRODUCTION

This equipment is factory set to brew approximately 6-8 ounces of coffee or tea into an awaiting dispenser. It is only for indoor use on a sturdy counter or shelf. Replace any unreadable or damaged labels.

USER NOTICES

As directed in the International Plumbing Code of the International Code Council and the Food Code Manual of the Food and Drug Administration (FDA), this equipment must be installed with adequate backflow prevention to comply with federal, state and local codes. For models installed outside the U.S.A., you must comply with the applicable Plumbing /Sanitation Code for your area.

To reduce the risk of electric shock, do not remove or open cover. No user-serviceable parts inside.
ELECTRICAL REQUIREMENTS

CAUTION - The brewer must be disconnected from the power source until specified in Initial Set-Up.

Refer to Data Plate on the Brewer, and local/national electrical codes to determine circuit requirements.

120 VOLT Model

Note: This electrical service consists of 2 current carrying conductors (L1 and Neutral) and a separate conductor for chassis ground.

Electrical Hook-Up

CAUTION – Improper electrical installation will damage electronic components.

1. An electrician must provide electrical service as specified.
2. Using a voltmeter, check the voltage and color coding of each conductor at the electrical source.
3. If plumbing is to be hooked up later be sure the brewer is disconnected from the power source. If plumbing has been hooked up, the brewer is ready for Initial Set-Up.
PLUMBING REQUIREMENTS

These brewers must be connected to a cold water system with operating pressure between 20 and 90 psi (138 and 620 kPa) from a ½˝ or larger supply line. A shut-off valve should be installed in the line before the brewer. Install a regulator in the line when pressure is greater than 90 psi (620 kPa) to reduce it to 50 psi (345 kPa). The water inlet fitting is .75-11.5 NH (HOSE THREAD). For convenience an elbow adaptor is provided to convert to a ¼˝ flare fitting. Bunn-O-Matic does not recommend the use of a reverse-osmosis or deionized water supply to this equipment.

NOTE - Bunn-O-Matic recommends ¼˝ copper tubing for installations of less than 25 feet and ⅜” for more than 25 feet from the ½˝ water supply line. A tight coil of tubing in the water line will facilitate moving the brewer to clean the countertop. Bunn-O-Matic does not recommend the use of a saddle valve to install the brewer. The size and shape of the hole made in the supply line by this type of device may restrict water flow.

As directed in the International Plumbing Code of the International Code Council and the Food Code Manual of the Food and Drug Administration (FDA), this equipment must be installed with adequate backflow prevention to comply with federal, state and local codes. For models installed outside the U.S.A., you must comply with the applicable Plumbing /Sanitation Code for your area.

NOTE - If a backflow preventer is required by code, a shock arrestor should be installed between backflow preventer and dispenser. Installing the shock arrestor as close to the dispenser as possible will provide the best results.

Plumbing Hook-Up
1. Flush the water line.
2. Securely attach the adaptor elbow assembly to the ¼˝ flare fitting on water supply line.
3. Securely attach adaptor elbow assembly to the the .75-11.5 NH fitting at the rear of the brewer.
4. Turn on the water supply.

INITIAL SET-UP
1. Connect to power source.
2. Turn on main switch.
3. Wait approximately ten minutes for the tank to fill and heat. The display will read “READY TO BREW” when tank reaches it’s operating temperature.

The brewer is now ready for use in accordance with the instructions for Coffee Brewing.
NOTE: Water volumes and flow settings have been preset at the factory. Refer to "PROGRAMMING" section of this manual for the "DRINK SETUP SCREEN", should the volume need to be increased or decreased.
CLEANING

BASKET HOLDER
1. Disconnect brewer from power source and allow to cool.
2. Raise lever to access the basket holder.
3. Tilt basket back and loosen screw a few turns.
4. Tilt forward and lift basket out.
5. Wash and rinse basket. Verify holes are cleared.
   **CAUTION: BASKET CONTAINS A SHARP NEEDLE.**
6. Install basket back into holder, carefully snug screw back in.

DRIP TRAY
1. Pull the drip tray out.
2. Lift the drip tray cover up.

CARTRIDGE BIN
1. Open front door.
2. Slide bin forward.
3. Empty as needed.

The use of a damp cloth rinsed in any mild, nonabrasive, liquid detergent is recommended for cleaning exterior surfaces except display screen. To clean display screen, turn off power and use a soft damp cloth with no chemicals.
**TANK DRAINING**

1. Disconnect the power and water supply to brewer. Allow brewer to cool before proceeding.
2. Remove 4 screws and the top cover.
3. Remove plug from tank lid.
4. Place brewer next to a sink.
5. Insert a syphon hose through the unplugged hole to syphon water out of tank.
Programming lockout switch

1. Disconnect brewer from power source.
2. Remove four screws and top cover.
3. Locate the slide switch on control board (behind display assembly).
   Down=normal, up=locked.

**NOTE:** When locked, only "time and date" can be changed, all other screens will display "READ ONLY".

**NOTE:** Brewer MUST be powered down each time switch is moved in order for the change to take effect.
Press "BUNN" logo until the program screen appears (below)

Select language, press "Save"

Press to highlight desired box, then press "Up" or "Down" to adjust. Press "Save" when finished.

User can reset "Current" counts, but not "Lifetime" counters

NOTE: Keypad will not be displayed if no password has been set

Enter four digit "password" Press "Enter"

PROGRAMMING

Password, Units, Drink Set Up

Password

Enter four digit "password" Press ‘Enter’ when finished

Units

Select "English" or "Metric". Press ‘Save’ when finished

Drink Set Up

Select desired drink to access setup screen

Here you can enable/disable by pressing the green box(s). Pressing white box (left side) will enable/disable the "COFFEE" icon (in previous screen). Pressing white box(s) under volume will display keypad to adjust ounces. Green box indicates selection is enabled. 4-16 oz. in .1 oz increments. Defaults: 6, 8, 10 oz.

Use advanced setup screen to adjust pump pressure and times. Lower pressure will increase brew times, higher pressure will decrease brew times. FOR TRAINED TECHNICIANS ONLY!

Drink Set Up

Select desired drink to access setup screen

Here you can enable/disable by pressing the green box(s). Pressing white box (left side) will enable/disable the "COFFEE" icon (in previous screen). Pressing white box(s) under volume will display keypad to adjust ounces. Green box indicates selection is enabled. 4-16 oz. in .1 oz increments. Defaults: 6, 8, 10 oz.

Use advanced setup screen to adjust pump pressure and times. Lower pressure will increase brew times, higher pressure will decrease brew times. FOR TRAINED TECHNICIANS ONLY!
MACHINE SETTINGS:

DRINK

Here you can enable/disable the brew lockout feature. Green box indicates selection is enabled and will not brew until temperature reaches the set value. Pressing the white temperature box(s) will display the keypad screen.

180-205°F in 1°F increments.

Defaults: Enabled/200°F/195°F.

WATER

Here you can enable/disable the Hot Water lockout feature. Green box indicates selection is enabled and hot water will not be dispensed when temperature is below the set value. Pressing the white box(s) will display the keypad screen.

180-200°F in 1°F increments. Defaults: Enabled/190°F.

ENERGY SAVER

Press the "Up" or "Down" buttons to adjust time.

Here you can enable/disable the energy saver feature. Green box indicates selection is enabled.

.5-24 hours in 30 minute increments. Choice of dropping to 140°F/60°C or "OFF".

Defaults: Disabled.
PROGRAMMING

SERVICE TOOLS:

IMPORT/EXPORT

1. Carefully insert USB flash drive into socket. **NOTE:** Make sure no other files are stored on drive other than what you are updating.
2. Turn on power switch. Go to Import/Export screen.
3. Press "Import". Allow files to finish loading.
4. Turn off the power switch.
5. Remove USB drive.
6. Re-install 4 screws and the top cover.
7. Turn on power switch.

To export machine settings:
1. Follow same procedures as above, except press "Export" to copy drink/machine settings to the flash drive.

To Import drink/machine settings:
1. Turn off the power switch.
2. Remove 4 screws and the top cover.

**MAIN SWITCH**

1. Turn off the power switch.
2. Remove 4 screws and the top cover.
Weigh an empty 12 ounce or larger container. Place empty container under brew chamber.

Enter the new value. When finished, Press “Enter” then “Save”. Verify/adjust cup volumes if needed.

CAUTION: HOT LIQUID WILL BE DISPENSED!
Press start. When cycle finishes, weigh filled container. Subtract first measure from second to get the net weight of water. Repeat procedure at least three times to get an average "volume". Press the white "Volume Dispensed" box. Enter in the averaged weighed volume. Press enter. Press “Save” to retain the new setting.
PROGRAMMING

CALIBRATE TANK TEMPERATURE

Insert a known accurate temperature sensing probe/device through the tank lid plug to a depth of 6 inches. Enter the “Measured temperature” in the white box. The “Un-calibrated Temperature” should be the old reading. “Calibrated Temperature” should be equal to the measured temperature. “Temperature Offset” should be the difference between the two.

CALIBRATE REFILL SENSITIVITY

Adjust sensitivity of refill probe according to water quality. Always make sure that the "Status" is filled. "New Refill Value should always be higher than "Current Refill Value" when water is contacting the tank refill probe.

DIAGNOSTICS

These two screens allows you to manually operate various machine components for testing purposes. All are defaulted to Off and may be momentarily turned on by pressing the associated white box next to it.

SERVICE TOOLS:

FOR TRAINED TECHNICIANS ONLY!
FACTORY DEFAULTS

BE SURE THIS IS WHAT YOU WANT TO DO BEFORE YOU START!

3. Carefully insert USB flash drive into socket. NOTE: Make sure no other files are stored on drive other than what you are updating.
4. Turn on power switch. Go to Import/Export screen. Press "Import". Allow files to finish loading.
5. Turn off the power switch.
6. Remove USB drive.
7. Re-install 4 screws and the top cover.
8. Turn on power switch.

NOTE: Resetting to factory defaults will reset drink settings, current history, language, units, and password. It will not reset calibrations or clear life counter.
