

PRECISION CORAVIN NEEDLES FOR THE PERFECT POUR.

Precision CORAVIN™ Needles pour wine smoothly and quickly so you can savor your glass right away. These high-grade needles are so gentle that they enable natural cork to instantly seal again upon removal. Coravin Needles come in three diameters to pair with young and old corks. Each needle is made of durable stainless steel and Teflon®-coated to make sure that the wine keeps on flowing, glass after glass.

Little needles that make a big difference

Each needle is designed to easily pass through natural cork, creating a path small enough to heal so the cork will continue to preserve your wine.

Three needles, endless choices

The Standard, Fast Pour and Vintage Cork Needles ensure that you'll have the right one on hand for any bottle.

Multi-glass capacity

Each needle is crafted from Teflon-coated, surgical stainless steel and lasts up to 1,000 pours.

DELIVERED THEN SEALED.

Color-coded Tops

Each textured grip is color-coded: silver for Vintage Cork, black for Standard, and red for Fast Pour.

Cleaning Tool

Included with each needle, the cleaning tool easily cleans the needle of occasional excess cork.

Smart Grip

Change needles with ease, thanks to the smart textured grip atop each needle.

Ultra-thin Walls

Each needle has an easy-pour gauge and thin walls, for the smoothest, quickest pour possible.
