

Non GMO Yeast Products and Production Declaration

The products listed below, provided by Lesaffre Yeast Corporation, are considered non-GMO following EEC regulations. They contain no GMO enzymes, have not been solvent-extracted, synthetically preserved or irradiated. They contain no artificial flavors or colors. There was no sewer sludge, petrochemical substrate, or sulfite waste liquor involved with any step of production.

**Products produced at our Cedar Rapids, IA and Dothan, AL facilities use a combination of beet molasses, cane molasses and corn syrup. While these material may be from GMO seed, GMO testing has shown there is no GMO protein or DNA in the raw materials used as growth substrate. All Red Star® and SAF® brand dry active or instant yeast products are grown on cane molasses. The cane molasses is sourced primarily from Mexico, Honduras and/or Guatemala.

Red Star Brand Products:

**Red Star® Compressed Yeast Products
**Cool Smartyeast®
**Red Star® Yeastade 50
