Tap Into T&S and Everpure's NEW Tap Water Filtration Solution

Your Assurance Of Serving the Best Tap Water

Why take a chance on serving tap water that does not meet your customer's expectations?

Tap water is one of the fastest-growing beverage orders in U.S. restaurants. Tap water orders currently make up to 8% of the 50 billion servings of beverages ordered in restaurants.¹ People today are more aware of the importance of drinking water in their daily lives, so the demand for high-quality tap water is increasing.

When customers order tap water, they expect it to be good-tasting, odor-free and contaminant-free. It is truly a clear reflection of the perceived cleanliness of one's restaurant or facility.

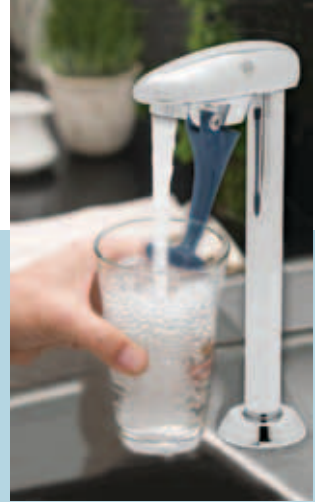

In response to this growing trend, **T&S Brass**, a leading manufacturer of foodservice plumbing products, and **Everpure**, the best-known name in water filtration systems around the world, are partnering to offer an optimal solution for serving great-tasting and safe tap water to your clientele.

We are now offering T&S glass fillers, bubblers and water stations with Everpure water filtration systems.

Besides restaurants and foodservice locales, hydration stations are becoming more and more available in public places. The reuse of personal water bottles is a growing trend; therefore the need for good-tasting tap water is a necessity.

Everpure's replaceable filter cartridge (B-WFC, left) and the docking station (B-WFDS, above)

B-1210-WFK glass filler model with water filtration system

Demand for serving good-tasting Filtered Tap Water is trending up in restaurants and other public places:

- Hydration stations
- Convenience stores
- Recreational facilities
- Outdoor activity centers
- Schools and churches
- Exercise studios/fitness centers
- Hospitals
- Airports and cruise ships

Additional benefits of serving the best Filtered Tap Water:

- It's more environmentally responsible than bottled water
- "Green" practices will save money for your restaurant

Also, "green-minded" customers who opt for tap water are aware they are helping to reduce the environmental impact by not ordering bottled water.

Check out our **T&S/Everpure water filtration models** on the back of this page.

"When customers receive good-tasting, odor-free and contaminant-free tap water, it is a clear reflection of the perceived cleanliness of your restaurant or facility."

Bubblers, Glass Fillers and Water Stations

Docking Station, Water Filter Cartridge and Starter Kits

Deck Mount Pedestal Glass Fillers and Water Stations with Water Filtration

These three glass filler models include water filtration (see drawing below):

B-1210-WFK

- 8" height from base of flange to outlet

B-1210-01-WFK

- 10" height from base of flange to outlet

B-1210-12-WFK

- 12" height from base of flange to outlet

B-1230-WFK Water Station with Water Filtration

This complete solution includes pedestal glass filler, stainless steel drip pan, grid, drain and water filtration kit with supply lines

Bubblers with Water Filtration

B-2360-WFK

- Fast self-closing metering cartridge with lever handle

B-2360-01-WFK

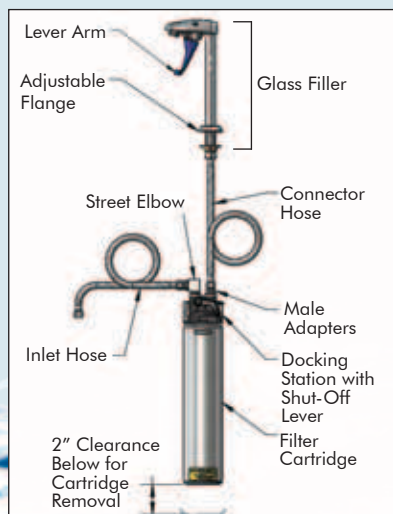

- Bubbler with push button metering cartridge

Glass Filler/Water Filtration Components

B-1210-WFK

This drawing illustrates a Glass Filler with Water Filtration components. See the B-WFK for individual parts included in Water Filtration models.

FEATURES

B-WFDS Docking Station

- Includes integral shut-off valve for easy cartridge replacement
- Includes mounting bracket and screws
- Engineered for durability, strength and longevity in foodservice applications
- Will not corrode
- Wetted parts pass NSF extraction tests
- Inlet-outlet size: 3/8" NPT female
- Accepts B-WFC water filter cartridge

B-WFDS

B-WFC Water Filter Cartridge

- Balanced cartridge for optimum performance in varying water conditions
- 15,000 gallon capacity
- 0.5 micron rating
- Reduces chlorine taste and odor
- NSF certified under NSF/ANSI standards 42 and 53

B-WFC

B-WFK Water Filtration Starter Kit

Includes docking station (B-WFDS), cartridge (B-WFC) and all necessary installation components:

- (1) 3/8" street elbow (148X)
- (2) 3/8" NPT x 9/16"-24 UN male adapters (006101-45)
- (1) 20" stainless steel braided inlet hose 9/16"-24 UN female (3/8" comp) (013146-45)
- (1) 18" stainless steel braided connector hose 9/16"-24 UN female x 1-1/2" NPSM (5EF-0005)
- (2) mounting screws
