

> INTRODUCING THE TRAUlsen MILK COOLER  
WITH TOP-MOUNTED REFRIGERATION

Durability, convenience, and renowned airflow. We make milk cooler.

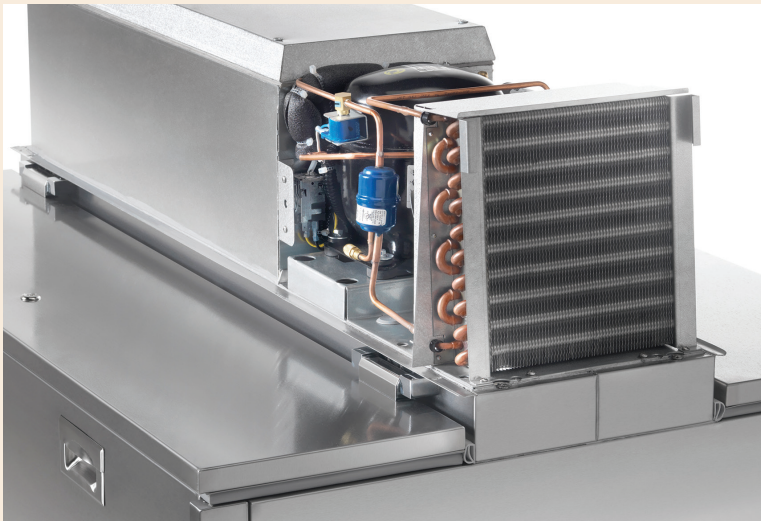

**Traulsen**  
TRUSTED.

**Built strong for your kids.  
Built smart for your budget.**

For you, every day's a balancing act. While fueling students for success, you're managing everything else, too — from service-line flow to maintenance and budgetary constraints. That's why we consulted you when designing our milk cooler. When you told us you needed a reliable, longer lasting milk cabinet that supports your budget while providing easier access even for your smallest students, we listened.

Introducing the Traulsen Milk Cooler. It's engineered to perform years longer than the competitors while delivering lasting value to your bottom line.

### **Removable, top-mounted system saves time and labor.**

- By placing the milk cooler's refrigeration system on top, we were able to drop our cabinet closer to the ground. That means even your kindergarteners can just grab their milk and go! No more stretching or climbing. And no more re-stationing your kitchen staff.
- Our top-breathing system inhales less floor dust and dirt, extending compressor life.
- Simply detach a few screws for system removal, minimizing on-site service time for repair or replacement.

### **Milk stays cold, even with the door open.**

Our specially engineered forced-air design circulates a consistently cool blanket of air above and below your beverages, extending over the product surface and down the entire length of the cabinet.

## Our milk cooler's "Traulsen tough."

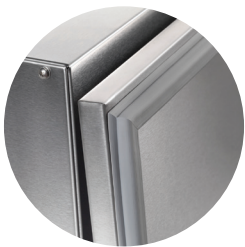

Keeping the real-life demands of your busy serving line in mind, we built our rugged milk cooler to last. Its 100% stainless steel cabinet features a reinforced exterior bottom, additionally secured by heavy-duty dunnage racks. And, our sliding front door design helps protect the gasket from everyday wear and tear.

### Know what's even cooler? Our value lasts for years and years.

We know that total cost of ownership plays an important role in your purchasing decision. So we worked hard to ensure that your milk cooler provides the value you need now, and for years to come.

- Our factory-installed casters reduce installation costs. We even make moving and leveling a breeze by including two factory-installed caster rails.
- Simply use sanitizer to clean up the EZ-Clean Santoprene® Gasket, which is protected by the milk cooler's sliding door design for longer life and performance.
- And, of course, we include our industry-leading three-year warranty. That's three years for parts and labor, plus an additional two years for the compressor.

**3-YEAR**  
PARTS & LABOR WARRANTY

- > The milk cooler is available in 8-, 12- and 16-crate capacities with single- and double-sided access.

## *Fresh Thinking. Since 1938.*

**You ask. We listen. The innovation never stops.** For 75 years at Traulsen, we've followed this winning formula for making things better for you. When you have an idea, we want to hear it. If you have a problem, we need to solve it. Many of our best product enhancements have been responses to direct requests from our customers, and we are always seeking new ways to improve your daily operation. Because at Traulsen, it's not just about making equipment for our customers. It's about making solutions.
