

Comark Warranty

All Comark instruments have a minimum One Year Warranty unless otherwise stated. The warranty for temperature probes is six months.

The Comark Warranty covers manufacturing defects and component failure and applies worldwide. In line with our policy of continuous improvement, we reserve the right to alter any product specification without notice.

Comark products are designed and manufactured for commercial use by trained operators. Any reference to “dishwasher safe” refers to commercial dish machines, not domestic or home dish washers.

“Waterproof” denotes that a unit can be used in the wet environment of commercial establishment. Comark thermometers are not designed for use underwater.

Comark Instruments is committed to providing quality and affordable products to the foodservice industry. Our thermometers, probes and humidity testers bring speed, accuracy and reliability to the transport, testing and storage of food under HACCP guidelines.

BioCote®

Selected Comark thermometers, probes and data loggers have BioCote® silver technology incorporated into instrument cases and probe handles at the time of manufacture. The antimicrobial finish inhibits the growth of bacteria and reduces the risk of cross-contamination and infection in the environment.

BioCote has been officially recognized for its benefits within the food industry with HACCP International Certification and is the only antimicrobial solution to be awarded this honor.
