The usual precautionary measures for handling chemicals should be followed.

Do not eat or drink while working.

Wash hands before breaks and at the end of work.

Do not inhale gases / fumes / aerosols.

**Breathing equipment:**

Not necessary if room is well-ventilated.

Use suitable respiratory protective device in case of insufficient ventilation.

Use suitable respiratory protective device only when aerosol or mist is formed.

Filter A/P2

**Protection of hands:**

If the risk assessment necessitates, wear protective gloves. The glove material has to be impermeable/resistant against the product and be suitable for the tasks to be performed.

**Material of gloves**

Use solvent/hydrocarbon resistant gloves. Suitable are gloves from: nitrile rubber (thickness &gt;0,38 mm, breakthrough time &gt; 480 min), fluorocarbon rubber (thickness &gt;0,38 mm, breakthrough time &gt; 480 min).

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

**Penetration time of glove material**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**Eye protection:**

Safety glasses with side protection (EN 166).
