GDC SERIES - GLASS DOOR REFRIGERATOR

Used for the merchandising and storage of hermetically sealed products for sale

CABINET CONSTRUCTION

Heavy duty construction includes white-coated aluminum interior walls and stainless steel floor. Exterior features peel and chip-resistant, powder-coated cold rolled steel that is durable and easy to clean.

LED lighted interior saves energy by producing less heat and maximizes product visibility in display area.

Foamed-in-place CFC- and HCFC-free polyurethane insulation enhances the structural strength of the cabinet and helps increase energy efficiency.

One-piece grill is easily removed for cleaning and servicing.

2 doors feature inside and outside tempered glass panes. Self-closing, sliding doors won't fog with use, ensuring clear product visibility at all times. Unlike swing doors, they don't require clearance outside the unit to open.

REFRIGERATION SYSTEM

Environmentally-safe R290 refrigerant. Bottom-mounted condensing unit positioned for easy maintenance. "No stoop" lower shelf maximizes visibility by raising merchandised product to a higher level.

SHELVING

8 white epoxy-coated steel shelves included. Each accommodate up to 88 lb.

MODEL FEATURES

Copper evaporator coil eliminates the potential of corrosion.

Convenient clean-out drain built into cabinet floor.

Easy to read digital controls.
