Notes & Details

Utilize this Avaweigh RS400T 400 lb. digital treaded receiving scale to ensure you're receiving the proper product amounts at your restaurant, hotel, or business. This unit is durable, with a 12" x 12", treaded steel platform that is sure to stand up to wear and tear in any commercial or industrial environment. The durable non-skid tread design prevents packages from slipping off to ensure accurate readouts and prevent injury or accident. The unit has a corrosion-resistant aluminum indicator, which utilizes a clear 1/2" LCD display, intuitive controls, and a mounting bracket. A 9' coiled cable allows you to place the indicator where it's most convenient. The remote display structure is perfect for weighing larger objects where the readout may be obscured. The scale has the ability to weigh items in either pounds or kilograms.

The Avaweigh RS400T receiving scale possesses the capability to weigh, hold, and tare, which deducts container weight and zeroes out for multiple ingredient measurement, adding versatility and adaptability for all of your weighing needs. It also has auto shut-off, which conserves battery power, a low battery indicator mode to prevent unexpected power loss, and an overload indicator to prevent damage to the scale. The Avaweigh RS400T includes adjustable feet and a heavy-duty metal base to guarantee sturdy performance. The scale uses (4) "AAA" batteries (sold separately) or an AC adapter (included).
