- 5 PSI adjustable regulator and rubber hose
- Sturdy tripod design with aluminum construction

Certifications

Portable LP Tank Connection

Notes & Details

Fry up delicious fish filets, fries, chicken wings, and other crispy food with this Backyard Pro 10 qt. fish fryer! Specially designed for outdoor cooking, this fryer is great for barbecues, fairs, and sporting events. A powerful 55,000 BTU cast iron burner gives this unit plenty of power to cook a wide variety of delicacies, and the built-in 360 degree windscreens ensure a strong, steady flame for even cooking. Side pot holders and the recessed top ring ensure stability during use.

This fish fryer features a large 13" cooking surface that easily accommodates the included 10 qt. aluminum pot. A perforated basket allows you to drain oil from your fried fish before serving, and can also double as a steamer basket for steaming clams or vegetables. To help you achieve the desired oil temperature, a 5" deep fry thermometer is included. It measures from 100-750 degrees Fahrenheit and comes with a clip so you can secure it to the side of the pot.

A solid foundation for your fry pot is important when you're frying outside. This fryer features a tripod stand design, reinforced with a bottom ring to make sure the hot contents stay inside the pot where they belong. A 5 PSI adjustable regulator and rubber hose ensure steady fuel flow from your existing liquid propane tank to your burner for efficient, consistent results at your outdoor events. This fryer ships knocked down to save you money on shipping costs.
