

CLABBER GIRL® Double-Acting Baking Powder

Clabber Girl Baking Powder has been the industry standard for over 100 years. The 5 lb. and 10 lb. containers are easy to carry and are stackable for better storage. The tight fitting lids keep moisture out, so our double-acting baking powder has great shelf stability.

Experts on hand to serve you!

Our baking experts are available to develop special leavening agents or to formulate and test recipes for your kitchen.

Use Level

Clabber Girl has the same CO₂ gas release as the majority of double-acting bakery and institutional type baking powders. For various types of baking products, use the typical amounts. For very light products you may need 6% or a little more.

Ingredients

Clabber Girl Baking Powder contains food grade corn starch, sodium bicarbonate (baking soda), anhydrous sodium aluminum sulfate and monocalcium phosphate.

Leavening Action

Leavening CO₂ is released by the reaction of the sodium aluminum sulfate and monocalcium phosphate in the presence of moisture. About 30% is released at batter temperature, and the rest is released in the oven.

Storage

Store in a cool, dry place and keep container tightly closed. Heat and moisture are harmful and should be avoided.

Clabber Girl Double- Acting Baking Powder, is trusted by bakeries, hotels, restaurants and institutions to produce baked products with excellent grain and texture.
