This dimension is the furthest point the dome protrudes as it opens. It is 1.194 inches further back than the rear flange of the cabinet shell. Please refer to the installation manual for clearances to combustibles when installing the grill assembly.

This dimension is from the center of the manifold to the outside of the grill body. Add any additional clearances for the cut-out to this dimension

Dimensions shown are actual physical dimensions. Additional clearances to the cabinetry are dependent on the tolerances of the cut-out. We recommend an additional .250 inches around all openings but this can be reduced if the tolerances are controlled. Please refer to the installation manual for additional clearances and clearances to combustibles.

50.543
CV-BI-48 Shown
For CV-BI-24 Dimension is 25.143
For CV-BI-30 Dimension is 31.143
For CV-BI-36 Dimension is 37.143
