

Water Works

- Our Water Works™ Fresh Water Delivery system provides 100 gallons of fresh water using a built-in, on-demand pump. It's the perfect accessory wherever people work – office trailers, food service trailers, tool cribs, lunch rooms – for portable showers, sinks and fresh-water portable flush toilets. Designed to operate on regular household current, the circuits are protected by GFCI and a low-water electrical shut-off.
- If more fresh water capacity is needed, the Water Works™ Auxiliary Tank can be used to double the capacity.
- The addition of a 250 or 300-gallon holding tank provides complete sanitation service to any trailer or mobile office.

Advantages over other alternatives:

- Easy to install, service, clean and transport
- On-demand electrical pump delivers 100 gallons of fresh water whenever it is needed
- Only 46 pounds empty, it can be transported to a service site by one person
- Dimensions (60" high by 23" wide) are designed to fit inside even the smallest closet

Part No. FWD3-1000

FEATURES

- Can be plumbed to fill from outside the trailer
- When it is time to empty and remove, water quickly drains through its 1" valve
- Cleaning the inside is easy through the 10" diameter access cover at the top
- Tank is semi-transparent, so customers or service personnel can tell at a glance how much water is left
