- The e4s can produce lightning fast, crisp, hot food with consistent results everytime thanks to the easyTOUCH™ icon screen.
- Approved metal baking trays can be used in the oven.
- Oven controls allow multi-stage programming. Each program offers up to 6 stages each with its own time, microwave power, impingement settings and between stage instructions.
- The USB memory stick allows the user to upload and download up to 1024 new programs with custom pictures. A change of menu could be implemented simultaneously in remote sites using this feature.

How it works:

The convection fan pulls air in through the Air Diffuser (1) This is then heated and returned to the cavity through the catalyst (2) and impinger plates (3) to produce an even heat pattern in the oven. This heat pattern allows food to cook evenly and produces a crisp golden finish, everytime.
