

The Color-Coded Foodservice System enables users to protect their patrons from foodborne illnesses and allergens. Color-coded tongs help keep food separated and reduce the risk of cross-contamination during food preparation or while serving.

Features and Benefits:

- Part of a complete color-coded foodservice system
- 22-gauge stainless steel
- Rubber grip on handles enables better control
- Scalloped-edge design for easy gripping of food
- Commercial dishwasher-safe

Material Composition:

Stainless Steel
