

Glenray[®] Kettle

10.5 qt. (10 L) warming and holding equipment

**The New Glenray[®] Kettle.
Takes Whatever You Serve Up!**

We've added new features to the No. 1 soup-warming kettle to make it more rugged and even easier to use. It's still the same multifunctional kettle you've come to rely on to prepare, warm, and hold soups and stews—but now even better!

The new seamless, one-piece 304 stainless steel insert is built to last and makes cleanup easier than ever. The more robust lid hinge is made of extra-sturdy 304 stainless steel to stand up to repeated use, day after day, year after year. The collar is now made of powder-coated 304 stainless steel for added durability and corrosion resistance.

Whatever kitchens and customers can dish out, the new Glenray Kettle is tough enough to take it.

The toughest, most versatile Glenray Kettle ever!
